The Background

Rapidly ageing societies, increased prevalence of new chronic conditions, multiple morbidities, etc. call for enhanced

- Health risk prevention
- Assistance for health issue treatments
- Access to innovations

The Challenge

- Strive towards wellbeing, happy and healthy ageing
- Foster digital health collaboration globally
- Accelerate development of new approaches and technologies
- Share experiences, innovative approaches and best practices to learn from each other
- Collaborate and make joint efforts

The Approach

Expert-driven approach, involving **stakeholders from Research, Technology and Innovation (RTI), policy, and user associations,** to

- Consider the **context of society, technology and industry**
- Look into the **policy framework**
- Gather the opinion of **funding authorities**
- Ensure alignment with common **priorities**

IDIH Main Objectives

- Foster international collaboration for digital solutions in health care benefitting the society
- Identify key opportunities and shared priorities
- Operate as catalyst for related international dialogue and collaboration
- Set up a **Digital Health Transformation Forum**

Expected Outcomes

- Increased awareness of relevant research and innovation initiatives
- Enhanced international collaboration and networking
- Access to future markets

> ❯ **A roadmap on priority areas and potential funding schemes**

Digital Health Transformation Forum

The vision of the IDIH project is to pioneer a transnational approach to global challenges in Active and Healthy Ageing (AHA). The international Digital Health Transformation Forum gathers top-notch experts from EU and the 5 Strategic Partner Countries, with the aim to:

- Develop a Roadmap with concrete measures for enhancing collaboration in priority areas
- Pave a path that overcomes fragmentation in R&I Investments in AHA
- Tackle system biases in AHA e.g., in terms of gender, regions, cultures etc.
- Generate impact from EU and international programmes
- Target future trends and drivers of high impact and disruption in AHA

IDIH Expert Groups

4 IDIH Expert Groups (EG)

- 6 or more experts per EG - 1 or more expert representing each IDIH country/region

Strategic topics of the 4 EGs

- Preventive care
- Integrated care
- Independent and connected living
- Inclusive living

Activities

- Collaborative actions
- Exchange in areas and topics of collaboration in digital health domains
- Ensure mutual learning and knowledge exchange between countries and regions
