CONCEPT | This Info Day of the project [IDIH - International Digital Health Cooperation for Preventive, Integrated, Independent and Inclusive Living](#), is an occasion to explore the findings of the [IDIH Digital Health Transformation Forum](#), discover the IDIH products and get aware about the project progress towards its sustainability. Some highlights on current opportunities for international cooperation in the field of Digital Health for Active and Healthy Ageing (AHA) will be also presented.

AGENDA	
9.00 – 9.10	Welcome and introduction <i>IDIH Coordinator</i>
9.10 – 9.15	About the IDIH Week 2022 <i>Mathilde De Bonis, APRE (IDIH Partner)</i>
9.15 – 9.30	EU policies in Digital Health for AHA under a Global Approach to Research and Innovation <i>Irina Calderon Libal, Policy and Programme officer, DG CONNECT, European Commission</i>
9.30 – 9.45	WHO Global strategy on digital health 2020-2025 <i>Sameer Pujari, Global Digital health Strategy & Governance, Vice Chair ITU WHO</i>
9.45 – 9.55	Towards the IDIH Roadmap to enhance international cooperation in Digital Health for AHA <i>Kristin Dallinger, IDIH Coordinator</i>
9.55 – 10.05	Findings from the IDIH Experts Forum <i>George Zissis, ATC (IDIH Partner)</i>
10.05 – 10.15	IDIH products for R&I stakeholders <i>Krisztina Dax, G.A.C. Group (IDIH Partner)</i>
10.15 – 10.30	Beyond IDIH: launch of the ENRICH Global International Experts Forum for Health Innovation <i>Mathilde De Bonis, APRE (IDIH Partner)</i> <i>Eva Fadil, G.A.C. Group (IDIH Partner)</i>
10.30 – 10.45	Scenario and perspectives for STI cooperation between Europe and LAC countries <i>Anneken Reise, DLR, ENRICH IN LAC</i>
10.45 – 11.00	Digital Health & AHA. Opportunities for international cooperation under Horizon Europe and beyond. <i>APRE (IDIH Partner)</i>
11.00	<i>Closure</i>

IDIH WEEK 2022 | AGENDA

Asian slot: 9.00 – 11.00 CET / 16.00 – 18.00 CST / 17.00 – 19.00 JST & KST
Americas slot: 15.00 – 17.00 CET / 9.00 – 11.00 EST / 6.00 – 8.00 PST

	MONDAY	TUESDAY	WEDNESDAY	THURSDAY	
Asian slots	Hour 1	INFO DAY	PITCH DAY 1	Japan Regional Workshop	INNOVATION DAY
	Hour 2				
American slots	Hour 3	US Regional Workshop (17.00 – 19.00 CET / 11.00 – 13.00 EST / 8.00 – 10.00 PST)	2 nd PLC Meeting (Reserved to Policy Makers)	PITCH DAY 2	INNOVATION DAY
	Hour 4				
	March 21	March 22	March 23	March 24	

THE BACKGROUND

Rapidly ageing societies, increased prevalence of new chronic conditions, multiple morbidities call for enhanced

- Health risk prevention
- Assistance for treatments of health issues
- Access to innovation

THE CHALLENGE

- Strive towards healthy ageing
 - Foster digital health collaboration globally
 - Accelerate development of new approaches and technologies
 - Share experience, innovative approaches and best practices
 - Collaborate and make joint efforts
- **Joint efforts and mutual learning for the benefit of the society and industry on a global level is vital.**

- **Full Title:** International Digital Health Cooperation for Preventive, Integrated, Independent and Inclusive Living
- **Duration:** May 2019 – April 2022
- **Aim:** Promote and increase international collaboration to advance digital health in the EU and key Strategic Partner Countries to support active and healthy ageing (AHA) through innovation

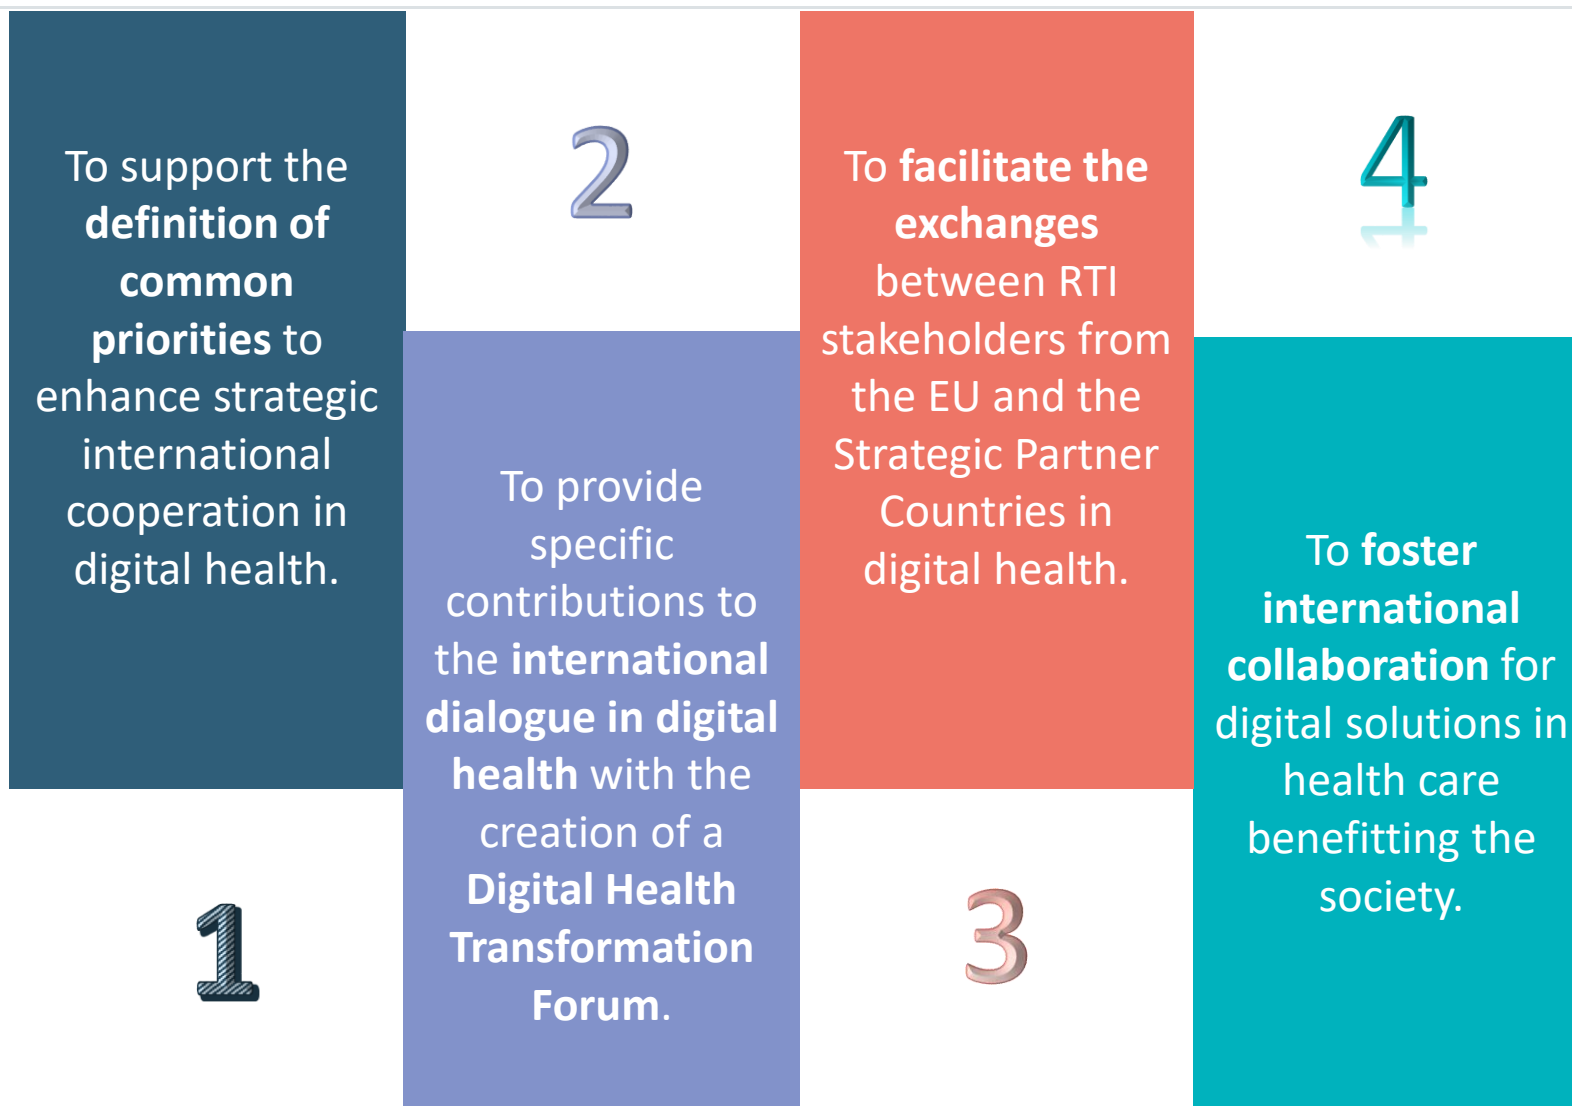

PROJECT PARTNERS

9 partners – 4 from the EU and 5 from the Strategic Partner Countries:
From research to industry through to governmental support organisations and networking platforms

▶ **IDIH** serves as a **CATALYST** for the **INTERNATIONAL DIALOGUE** in **DIGITAL HEALTH** for **AHA**

APPROACH | EXPERT-DRIVEN AROUND 4 STRATEGIC TOPICS

IDIH has set-up an expert-driven **Digital Health Transformation Forum** gathering top-notch experts, executives and advocacy groups from the six regions consisting of **4 Expert Groups**

Preventive care

Focus: Early diagnosis and detection

Active and healthy aging begins with a prolonged health regimen. Tech-enabled solutions that engage users in health and wellness techniques will allow active and meaningful senior lifestyles.

Integrated care

Focus: Using new technologies to redesign, coordinate, integrate health and social services & place citizens, patients and seniors at the centre of health systems.

Technology in the integrated care domain is intended to provide support at the point of care, anytime and anywhere.

Independent and connected living

Focus: Tele-monitoring via smart home and living technologies

Connected living is made possible through smart sensors and buildings, mHealth solutions, mobility aids, secure data, robotics, and e-health.

Inclusive living

Focus: Helping the elderly to feel socially more connected

Healthy environments equal healthy individuals. In the aging population, a component of healthy living is inclusivity, promoting positive social engagement, and ensuring a rewarding social aspect to age.

APPROACH | EXPERT-DRIVEN AROUND 4 STRATEGIC TOPICS

IDIH has set-up an expert-driven **Digital Health Transformation Forum** gathering top-notch experts, executives and advocacy groups from the six regions

consisting of **4 Expert Groups**

Preventive care

Integrated care

Independent and connected living

Inclusive living

to work on defining **common priorities** & identifying **opportunities** of mutual benefit.

to define a **Roadmap** towards enhanced **International Collaboration on Digital Solutions for Active and Healthy Ageing**

IDIH's EXPECTED IMPACT

Increased awareness of relevant research and innovation initiatives by stakeholders.

Improved competitiveness of European industry by opening up to international innovation possibilities and gaining access to future markets.

More networking between European and international stakeholders interested in international cooperation in the field.

Increased international cooperation in ICT research and innovation for AHA through a roadmap of priority areas and potential funding schemes.

Thank you for your attention!

CONCEPT | This Workshop intends to explore the **impacts of COVID-19 on Active and Healthy Ageing (AHA)**, with a special focus on Independent and Connected Living where there have been surges in innovation while progress has stalled as resources are shifted. Thanks to different perspectives, such as those of start-ups, investors, and the patients themselves, the workshop aims to survey a broader range of the relevant R&I landscape in the United States. In particular, by taking into consideration the findings of the [IDIH Digital Health Transformation Forum](#), around the areas of *Data Governance, Digital Inclusion, Interoperability-by-design*, a Panel Discussion will reflect on how they might be impacted in a post-COVID 19 scenario.

CET	EST	[Draft] AGENDA
17.00 – 17.05	11.00 – 11.05	Welcome and introduction <i>Catalyst (IDIH Partner)</i>
17.05 – 17.20	11.05 – 11.20	Aims and methodology of the USA Regional Workshop <i>Catalyst (IDIH Partner)</i>
17.20 – 18.20	11.20 – 12.20	Panel Discussion: <ul style="list-style-type: none"> Overview of COVID-19 impacts on AHA The IDIH proposal for priorities suitable for international cooperation on Digital Health and AHA: how a covid 19 scenario can affect their implementation? <i>Moderation by: Catalyst (IDIH Partner)</i>
18.20 – 18.35	12.20 – 12.35	Q&A
18.35 – 18.40	12.35 – 12.40	Break
18.40 – 19.00	12.40 – 13.00	Conclusions <i>Catalyst (IDIH Partner)</i>

CONCEPT | With the participation of the Ministry of Internal Affairs and Communication, in charge of *Horizon* in Japan, this Workshop (in Japanese with English subtitles) intends to explore **how Japan is facing Digital Transformation for a rapidly ageing society**, with a focus also on *Data sharing and security*. A panel-discussion will be held, then, with some key-players in the R&I landscape in Japan, reflecting on how to eliminate the Digital Divide, without anyone left behind. A session will be dedicated to Q&A with the audience.

[Draft] AGENDA

9.00 – 9.10	Welcome and introduction <i>Sakan Yamamoto, SAWARABI (IDIH Partner)</i>
9.10 – 9.40	How Japan is facing Digital Transformation for a rapidly ageing society? <i>Information sharing session by the Ministry of Internal Affairs and Communications (Japan)</i>
9.40 – 10.40	Panel Discussion: How can we eliminate digital divide? <ul style="list-style-type: none"> ▪ <i>Prof. Katuya Iijima, Tokyo University</i> ▪ <i>Prof. Katunori Kondo, Chiba University,</i> ▪ <i>Yasuko Akutsu, MT Healthcare Design Institute</i> ▪ <i>Sakan Yamamoto, Representative of the House, IDIH-Japan</i> <i>Moderation by: SAWARABI (IDIH Partner)</i>
10.40 – 10.50	Q&A

CONCEPT | Starting from the findings of IDIH Experts – gathered in the [IDIH Digital Health Transformation Forum](#) – this event will be the occasion to address Digital Health for Active and Healthy Ageing focusing on the three areas suggested by the IDIH Experts for enhancing international cooperation in the field: *Data Governance, Digital Inclusion, Interoperability-by-design*. Thanks to the participation of the [e-Vita project](#), a Panel Discussion, also based on the case studies offered by this EU-Japan collaboration, will further explore these areas highlighting tech challenges and opportunities offered by collaborative research at international level. A co-creation session will follow among the panellists, as well as the audience through ad hoc tools for live interactions.

AGENDA	
9.00 - 9.10	Welcome and introduction <i>Kristin Dallinger, IDIH Coordinator</i>
9.10 - 9.20	Data Governance: the outcomes of the IDIH Experts Forum in the field of Digital Health for Active and Healthy Ageing <i>APRE & ATC</i>
9.20 - 9.30	Governance from the end-users' perspective: State of the art and first design for an understandable interface for older adults <ul style="list-style-type: none"> ▪ <i>Dr. Jasmin Lehmann, Senior Researcher Social Sciences and Ethics at University of Siegen</i> ▪ <i>Dr. Rainer Wieching, Divisional Director Health and Prevention at University of Siegen in Germany and e-VITA EU project coordinator</i>
9.30 - 9.40	Digital Inclusion: the outcomes of the IDIH Experts Forum in the field of Digital Health for Active and Healthy Ageing <i>APRE & ATC</i>
9.40 - 9.50	Digital Inclusion: a case study from the e-VITA project <ul style="list-style-type: none"> ▪ <i>Roberta Bevilacqua, Researcher and Psychologist at INRCA, National Institute on Health and Science Aging, member of e-VITA project</i>
9.50 - 10.00	Interoperability-by-design: the outcomes of the IDIH Experts Forum in the field of Digital Health for Active and Healthy Ageing <i>APRE & ATC</i>
10.00 – 10.10	Standardization of data and systems: addressing security and privacy of cross border data <ul style="list-style-type: none"> ▪ <i>Sara Casaccia, Assistant Professor, Università Politecnica delle Marche</i>
10.10 - 11.00	Co-creation session: improving IDIH outcomes based on the living labs experiences of e-Vita project
11.00	Closure

Innovating elderly care

SAAM - Supporting Active Ageing through Multimodal Coaching, with the creation of a virtual assistant. Extend, as much as possible, the active and independent life of people over 60 years of age living in their own homes, as well as to support the work of those taking care of them (family, friends, and social carers). <https://saam2020.eu/> 2017-20

Delivering personalised integrated health and social care services, better outcomes for older people and improved care experience. <https://projectvaluecare.eu> 2019-2023

vCare aims to provide a smart coaching solution grounded on personalized care pathways. vCare stands for Virtual Coaching activities for rehabilitation in elderly and aims at an improved rehabilitation for people as they age. <https://vcare-project.eu/> 2017-2021

ICT platform helping the family, caregivers and social care systems to share information on activities, conditions and moods of those they care about. A trusted ecosystem for apps providers. www.ehcobutler.eu 2015-2017

Innovative solutions for independent living

SMART BEAR

2019-2023

Integrated Platform -sensors, assistive medical and mobile devices enabling continuous data collection from the everyday life of the elderly, which will be analysed to obtain the evidence needed in order to offer personalised interventions promoting their healthy and independent living.

WORKING AGE

2019-2022

Measuring the user **emotional/cognitive/health state** and create communication paths. Promoting healthy habits of users in their working environment and daily living activities in order to improve their working and living conditions.

sustAGE

Person-centered solution for promoting the concept of "sustainable work" for EU industries, focuses on the **support of the employment and later retirement of older adults** from work and the optimization of the workforce management. 2019-2021

COADAPT

Framework providing principles for a two-way **adaptation in support** of ageing citizens, defining three types of smart adaptations in work systems with different level of technology sophistication. 2018-2022

BIONIC

body information on an intelligent chip

Platform for realtime **risk alerting and continuous coaching**, enabling the design of workplace interventions adapted to the needs and fitness levels of specific ageing workforce. 2019-2021

seefar

Digitally enabled adaptive solution supporting ageing **workforce with vision loss**, an age-related condition, to remain actively involved in professional life. 2018-2021

ageing at work

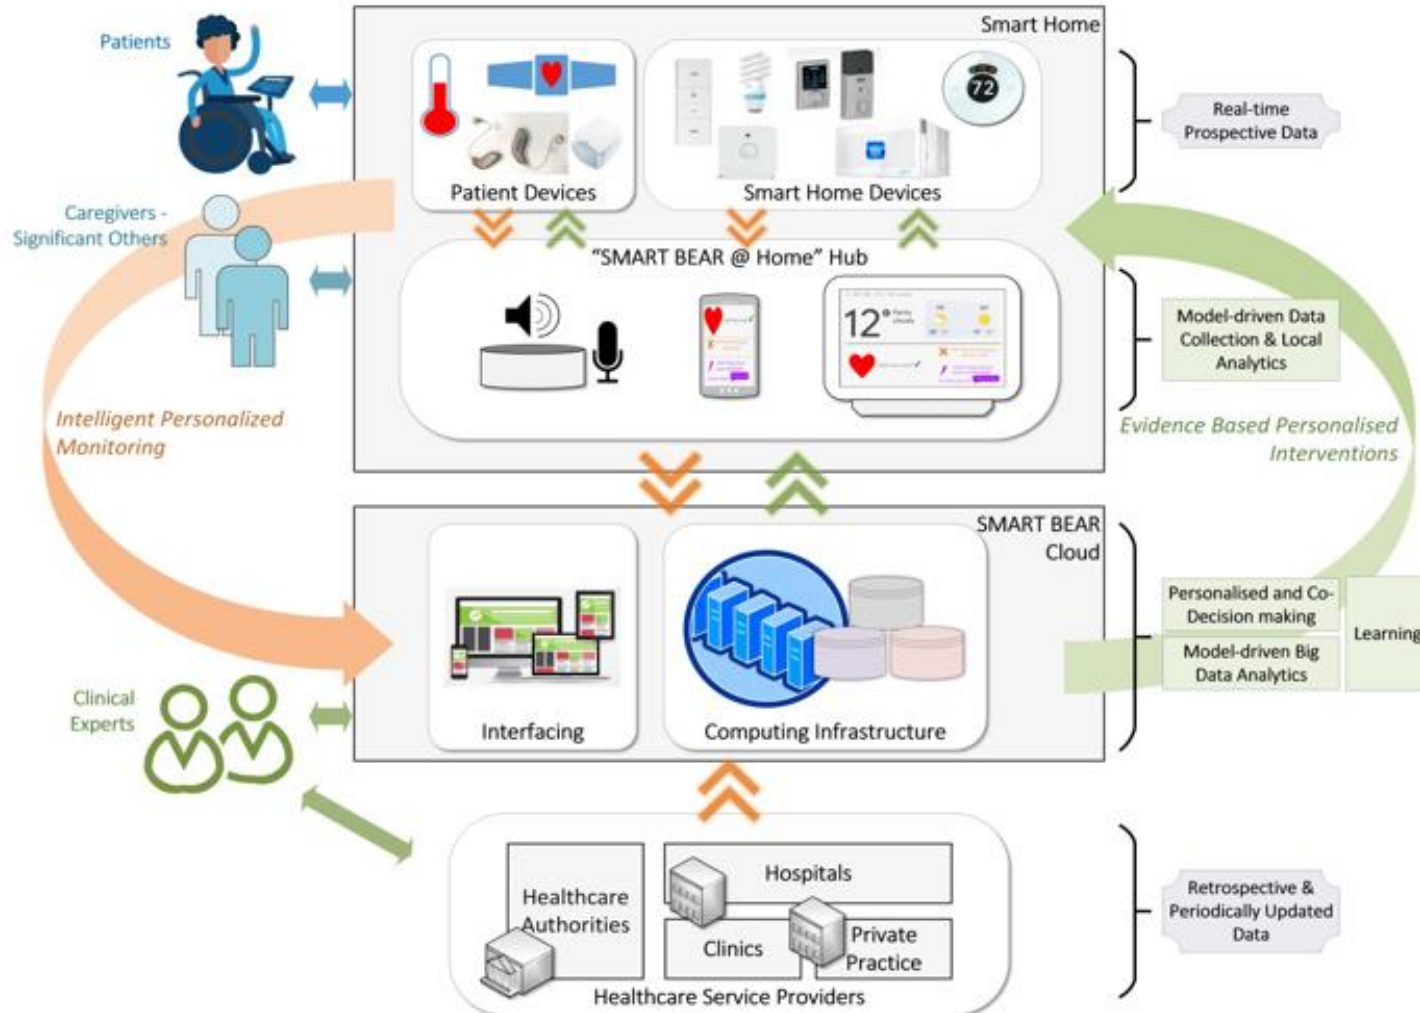

HR Health Management for Older Workers

ICT-based, personalized system to support ageing workers into designing fit-for-purpose work environments and managing flexibly their evolving needs. 2019-2021

Worker-centric AI system for **work ability sustainability**, integrating unobtrusive sensing and modelling of the worker state with a suite of novel services for context and worker-aware adaptive work support. It empowers the employer with AI decision support tools for efficient task completion and work team optimization through flexible work practices. 2019-2021

The SMART BEAR platform

The aim is to integrate **heterogeneous sensors**, assistive medical and mobile devices to enable the continuous **data** collection from the everyday life of the elderly, which will be **analysed** to obtain the evidence needed in order to offer **personalised interventions** promoting their healthy and independent living

AAL Achievements

The AAL Programme has delivered in multiple areas:

- It has **helped develop solutions** that are **used by older adults** and their networks, promising meaningful change to their lives
- AAL-funded solutions are being used by **carers in formal health and care settings**
- It has helped raise **awareness**, create new **skills & collaborations**, and lay the foundation for **market segments** across Europe

AAL has strengthened the Industrial base in Europe:

- 31 solutions have been developed and commercially launched in 13 EU countries
- 24 AAL-funded projects or 12% of all projects launched a solution
- Growing number of paying customers of solutions contribute to increased revenue by companies

103 Reference Sites and Twinnings:

4th Call for AHA Reference Sites to be launched in March 2022

An Open Call for active and healthy ageing Reference Sites will be launched later this month. *****FIND OUT MORE*****

Regions, or municipalities that can demonstrate they are bringing together all relevant stakeholders to pursue the development and implementation of innovation and digital technology solutions for a whole life course approach to active and healthy ageing are welcome to apply.

All existing Reference Sites wishing to be reaccredited will also be required to apply.

The AHA market - Lessons learned

- The AHA market is **highly fragmented** with several limitations preventing its rapid growth, mainly highlighting complex and individually regulated healthcare systems, inaccessibility of necessary data, and lack of Europe-wide support.
- AHA market in the EU is **a difficult market to navigate in**, not only for start-ups but also investors and facilitators, as it is still an emerging one, especially compared to the US market.
- The AHA market is **a slow market** in terms of the speed of adoption of innovative solutions, and in generating ROI, those two aspects were seen as being highly interdependent.
- **Older population has** increased price sensitivity, conservatism in decision-making, and lack of trust in innovative solutions, especially technology-based ones, if compared to other segments.

Some solutions..

- Initiatives national, EU and International level
- Innovators prepared to navigate the complexities
- Government-backed sandboxes
- Comprehensive ways to engage with stakeholders
- Initiatives to change the attitudes via education and intergenerational contact
- A needs-based rather than aged-based solutions, shift from “healthy ageing” to “healthy living”
- Specialised accelerators and sandboxes for AHA businesses
- Implementing initiatives that encourage investor activity in the AHA market

Global strategy on digital health

Improve health for everyone...affordable, scalable digital health and wellbeing...support equitable access to quality health services...implication for access, cost, quality of digital solutions

Global Strategy on Digital Health 2020 – 2025 :

Vision

To improve health for everyone, everywhere by accelerating the development and adoption of appropriate digital health solutions to achieve the health related SDGs.

The background features several abstract geometric shapes in various colors: a large dark blue circle at the top left, a medium blue circle below it, a light blue semi-circle at the top right, a bright green semi-circle at the top right, a light blue semi-circle on the left, a dark green circle on the right, a bright green semi-circle at the bottom left, a small orange circle in the lower middle, a green vertical rectangle at the bottom center, and a blue organic shape at the bottom right.

Strategic objectives

4 Strategic Objectives

Global strategy on digital health

The Seventy-third World Health Assembly, having considered the consolidated report by the Director-General¹ and the draft global strategy on digital health,² decided:

- (1) to endorse the global strategy on digital health;
- (2) to request the Director-General to report back on progress in the implementation of the global strategy on digital health to the Seventy-sixth World Health Assembly in 2023.

Third plenary meeting, resumed session, 13 November 2020
A73/VR/3 (resumed)

SO1 Promote **global collaboration** and advance the **transfer of knowledge** on digital health

SO2 Advance the **implementation** of national digital health strategies

SO3 Strengthen **governance** for digital health at global, regional and national levels

SO4 Advocate **people-centred health systems** that are enabled by digital health

SO1 Promote **global collaboration** and advance the **transfer of knowledge** on digital health

Short term

- Networks and partnerships
- Capacity-building

Medium term

- Policy dialogue
- Digital health research agenda

Long term

- Knowledge management
- Digital health global repository

Output highlight

- Prioritised digital health
- Multi-stakeholder groups convened
- Strengthened National information centres for diseases surveillance

Learning...sharing...

...**digital transformation of health system**

...Competences and capacities

Required skills for emerging functions...

Curriculum...

SO2 Advance the **implementation** of national digital health strategies

Short term

- Support scaled implementation
- Dynamic Digital Maturity Model
- Impact assessment

Medium term

- Digital health architectural blueprints
- Norms and standards

Long term

- Build trust
- Digital platform to assess digital health solutions

Output highlight

- Accelerated Digital health implementation
- Progress through **Dynamic health maturity model**

Informed decision...
...**frontline responders**...**policy makers**...
Value, trust...
Understand challenges...
Embrace change....

S03 Strengthen **governance** for digital health at global, regional and national levels

Short term

- Prioritise national investment
- Evidence-based technical documents

Medium term

- Regulatory framework
- Country level governance structure

Long term

- Policy actions in the digital health ecosystem
- Knowledge transfer for decision making
- Regulatory framework for AI

Output highlight

- Governance established
- **Guidance on digital hospitals , digital clinical trials and digital therapeutics**
- Global interoperability guidelines developed
- Guidance on health data security

Future policy...agenda setting...
...Evidence-based interventions
Required skills ...Governance...
Inclusive culture...

SO4 Advocate people-centred health systems that are enabled by digital health

Short term

- Global minimum standards for electronic health records
- Ethic frameworks
- Data security and governance

Medium term

- Promote digital health interventions
- Health data and interoperability

Long term

- Personalized medicine
- Research synthesis

Output highlight

- Improved **digital health literacy**
- Prioritized digital health technologies and programs
- Framework on digital health tools
- Guidance on personalised medicine developed

Develop and validate digital interventions....

...**Digital health literacy**

...equitable access to service, products and information

Digital divide

Equality...

Action plan outline

Objective	Outcomes	Impact
SO1. Promote collaboration and transfer of knowledge	Global alignment to address opportunities and challenges	Sustainable digital health ecosystem
SO2. Enhance leadership and coordination for digital health	Strategic vision and integrated action at the national level	Cost-effective health systems and services
SO3. Strengthen governance for digital health	Actions and investments based on informed decisions	Accelerated digitalization of the health and well-being sector
SO4. People-centred health systems enabled	People empowered to make healthy & health-enabling choices	Healthier population

Actions relevant to well-being and healthy aging

Strategy objectives	Timeline	Stakeholders	Description
SO3	Short term (1-2 years)	Member states	Analyse and document national start-ups working on innovative solutions to identify those that may have a sustainable impact on health and well-being .
SO4	Short term (1-2 years)	Member states	Strengthen public trust in digital health technologies and review the different education and training programmes on digital health by institution, level of degree, specialty and cost, and analyse current trends at the national level. Promote the use of population health management and gender-equality approaches through digital health applications to move health and well-being from reactive care models to active community-based models .
SO4	Medium term (2-4 years)	Member states	Developing population health management approaches through digital health solutions that move health and well-being from reactive care models to active community- based models.
SO4	Long term (4-6 years)	Member states	Synthesize national research and disseminate evidence on the contributions of digital health interventions to the performance of health systems and their impact on people's health and well-being .
SO4	Short term (1-2 years)	Member states	Strengthen public trust in digital health technologies and review the different education and training programmes on digital health by institution, level of degree, specialty and cost, and analyse current trends at the national level.
SO4	Long term (4-6 years)	Partners	Develop and promote the use of tools that support digitalizing processes at health service centres or relevant occasions with a focus on patients' empowerment , standardized processes and managed quality of service.
SO1	Long term (4-6 years)	Partners	Promote centres of excellence or innovation hubs to assess and implement digital health solutions that are aligned with country-defined needs and health related Sustainable Development Goals.
SO3	Short term (1-2 years)	WHO secretariat	Develop evidence-based technical documents on different topics related to digital health, such as cost-effectiveness, sustainability and affordability, ethical use, privacy and security, and safety in the context of health system strengthening, health emergency response and healthy wellbeing.
SO3	Short term (1-2 years)	WHO secretariat	Use inputs from experts (for example, the members of WHO's technical advisory group on digital health) to develop or update the pipeline of technical documents (for instance, handbooks, toolkits and guidelines) on digital health interventions to improve health and well-being.
SO3	Short term (1-2 years)	WHO secretariat	Assess and promote innovative solutions that can have an effective impact in the future of health and well-being.
SO1	Short term (1-2 years)	WHO secretariat	Promote health innovations where appropriate including cutting-edge digital technologies, such as the use of artificial intelligence , blockchain and big data analytics , and other emerging techniques and solutions in the health sector.
SO4	Medium term (2-4 years)	WHO secretariat	Promote digital health interventions while addressing social determinants of health.

Global digital health landscape for implementation

- The implement of the Global strategy on digital health relies on **an integrated transition** for countries from "eHealth" era into the new phase of the digital transformation.
- **Understanding of country situation** in both technical and policymaking aspect is essential for implementation
- Policy options and proposed actions outlined in the action plan may vary depending on the level of **digital health maturity** a country envisages
- The use of **artificial intelligence** hold great promise to improve diagnosis, treatment, health research and drug development and to support governments carrying out public health functions, however it must put ethics and human rights at the heart of its design, deployment, and use.

*We must ensure the
Digital Health
transformation is safe,
sustainable and leaves no
one behind.*

Thank you.

Action plan: Implementation cycle

Commit

Encourage Member States, partners and other stakeholders to commit to global, regional, and national strategies on digital health

1.
Commit

Catalyse

Create, scale and sustain an environment and processes that will facilitate and induce collaboration towards delivering results.

2.
Catalyse

Enhance & Iterate

Take a new cycle of actions based on what has been experienced, measured and learned

4.
**Enhance
& Iterate**

Measure

Create and adopt processes for monitoring and evaluating the strategy's effectiveness

3.
Measure

SO3 Strengthen **governance** for digital health at global, regional and national levels

The WHO guidance on *Ethics & Governance of Artificial Intelligence for Health*

- Legal, regulatory and non-legal measures for ethical use of AI for health.
- Identified areas of governance that could resolve the identified ethical challenges and integrate the six consensus principles.
- 47 recommendations for diverse stakeholders to implement.

IDIH

INTERNATIONAL COLLABORATION
DIGITAL TRANSFORMATION
HEALTHY AGEING

Towards the IDIH Roadmap to enhance international cooperation in digital health for AHA

IDIH Week 2022
March 21, 2022

Project coordinator:
Dr. Kristin Dallinger

**Steinbeis
Europa Zentrum**

PROMOTING DIGITAL HEALTH FOR AHA IN A GLOBALLY COORDINATED MANNER

Demand for international cooperation to address the challenges of AHA with digital health solutions in a globally coordinated manner leveraging on each partners' expertise.

IDIH has identified similar overarching challenges related to digital health for AHA faced by the EU, Canada, China, Japan, South Korea, and USA.

- **insufficiency of essential regulatory frameworks** regarding ethical and security issues on eHealth data access;
- **highly regulative and impeding procurement systems,**
- **complex certification procedures** that hinder the industrialization of digital healthcare, the development of related start-up cultures, and hence the growth of the digital health market;
- **lack of necessary funding for research and development** which is either not available in sufficient quantity or scattered across different funds and objectives.

PROMOTING DIGITAL HEALTH FOR AHA IN A GLOBALLY COORDINATED MANNER

IDIH is developing a **Roadmap for international cooperation** in the field of digital health for AHA on **prioritized health topics** to be jointly addressed to alleviate the healthcare burden through ageing and support AHA for all, including

- ❖ **understanding** of the complex health challenges arising from **multimorbidity** of the elderly related to ageing,
- ❖ **personalized medicine** for more effective, adult-centred solutions for the senior population,
- ❖ **measures** for **health promotion, disease prevention** and **care at home** and
- ❖ **social challenges** regarding **health care** and inclusion of elderly people.

AN EXPERT-DRIVEN APPROACH AND THREE STAKEHOLDER GROUPS

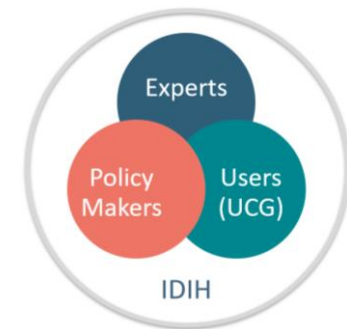

The elaboration of **IDIH Roadmap**, based on the preliminary study phase of the project, is the result of the works of the **Digital Health Transformation Forum (IDIH Experts)** that, through an **expert-driven approach**, has gathered top-notch experts, executives, and advocacy groups from six regions.

The **IDIH experts** enriched and consolidated their outcomes collecting further input and feedback from both **users (UCG - Users' Consultation Group)** and **policy makers (PLC - Programme Level Cooperation)**.

IDIH has set-up **4 Expert Groups** to work on

- (1) defining **common priorities** &
- (2) identifying **opportunities** of mutual benefit.

Preventive care

Integrated care

Independent and connected living

Inclusive living

These Expert Groups represent the **Digital Health Transformation Forum**, which is expected to become a long-lasting mechanism for international dialogue on exploitation of synergies, promising avenues, and open issues in digital health.

DIGITAL HEALTH TRANSFORMATION FORUM

Four Strategic Topics

	Preventive care	Integrated care	Independent and connected living	Inclusive living
	 <p>Focus: Early diagnosis and detection Active and healthy aging begins with a prolonged health regimen. Tech enabled solutions that engage users in health and wellness techniques will allow active and meaningful senior lifestyles.</p>	 <p>Focus: Using new technologies to redesign, coordinate and integrate health and social services and place citizens, patients and seniors at the centre of health systems. Technology in the integrated care domain is intended to provide support at the point of care, anytime and anywhere.</p>	 <p>Focus: Tele monitoring via smart home and living technologies Connected living is made possible through smart sensors and buildings, mHealth solutions, mobility aids, secure data, robotics, and e health</p>	 <p>Focus: Helping the elderly to feel socially more connected Healthy environments equal healthy individuals. In the aging population, a component of healthy living is inclusivity, promoting positive social engagement, and ensuring a rewarding social aspect to age</p>

CONSULTATION WITH THE UCG (USERS CONSULTATION GROUP)

The IDIH Experts Forum worked in close synergy with the **Users' Consultation Group (UCG) of IDIH**.

Composed of the 8 most relevant representatives of “end users” of the digital transformation of health and care in the EU and in the 5 Strategic Partner Countries, the UCG has guided the experts of the IDIH Forum to adopt **a user-centred perspective** by providing inputs and feedbacks to the works of the Forum.

Name	Organization	Region
Anna Odone	European Public Health Association (EUPHA)	EU
Feng Cao	Chinese Geriatrics Society	China
Gloria Gutman	North American Chapter International Society for Gerontechnology	Canada
Ilenia Gheno	AGE Platform Europe	EU
Jie Wang	Smart Health Care and Home Care Branch of China Association of Gerontology and Geriatrics (S2HC-CAGG)	China
Peggy Maguire	European Institute of Women's Health (EIWH)	EU
Stephen Johnston	Aging 2.0	USA/EU
Yasuko Akutsu	Association of Advanced Gerontology in Next Generation Japan	Japan

CONSULTATION WITH THE UCG (USERS CONSULTATION GROUP)

UCG members were engaged since the beginning of the project, providing their visions and feedback to the works of the IDIH Experts

- through remote consultation and the organization of **2 UCG meetings** -

whose results have been integrated in the elaboration of the final IDIH recommendations included in this Roadmap.

Name	Organization	Region
Anna Odone	European Public Health Association (EUPHA)	EU

CHECK AND VALIDATION THROUGH THE PLC (PROGRAMME LEVEL COOPERATION)

A **Programme Level Cooperation (PLC)** was developed engaging the relevant funding agencies to facilitate the international policy dialogue around Digital Health for AHA.

1^o PLC Meeting

Mar 27, 2021

BASIS

18 priorities suitable for international cooperation identified by EG in each of the 4 domains

SCOPE

Feedback and further input regarding **policy agendas** and **future nat. /reg. perspectives** around digital health for AHA

2^o PLC Meeting

Feb 03, 2022

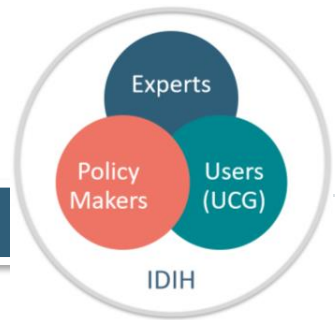

BASIS

Consolidated results of the IDIH Experts' Forum

SCOPE

Feedback and comments on **recommendations** on how to enhance international cooperation in **3 priority topics** proposed.

DEDICATED WEBINARS

Japan	Dr Takao Tashiro <i>The Open University of Japan</i>	Jisoo Lee <i>HealSage consulting</i>	Dr Hirohisa Hirukawa <i>NovusCare</i>	Dr Satoko Hotta <i>Keio University</i>

Common Priority 1 – Data Governance

To foster a shared understanding of the **determinants of healthy ageing** through new/existing multi-modal and **forward/backward longitudinal studies** and **Big Data analytics** based on the use of **multiple data sources** (such as patient reported data, patient validated data in EHRs, biometrics and biological data), validated with and by patients through **personalised-medicine approaches** and according with a shared **international validation framework** which also addresses **cybersecurity** aspects.

Expected Impact of Common Priority 1

- **Smoother and faster implementation by tech providers** of more sophisticated digital solutions and services that meet the future demand of data handling and allow a timely intervention on older persons and/or their care givers.
- **Improved self-management and quality of life of the older persons** through enhanced quality of more personalized, accessible and participated health care services.
- **Reduced workload and burnout risk for formal and informal carers.**
- Improved **communication** between patients and caregivers.
- **Improved planning and evaluation of health care services** based on the optimization of available data better informing decision making.
- **Reduced economic burden** of health care systems.
- Older persons and all citizens getting more familiar with sharing personal health data and allow **services integration**
- **Improved research outcomes** based on more accessible and accurate data
- **Enabled data driven and interoperable solutions** for different fields and applications.
- **Societal recognition of the importance of health determinants** throughout the life course.
- Improved **security** of health information systems.

Common Priority 2 – Digital Inclusion

*To favour inclusive healthcare systems through **age-friendly technologies** that address social isolation and loneliness, based on **empowerment** models, **inclusive co-design** and enhanced **digital literacy** practices, supported by international and **multi/transdisciplinary research** towards the adoption of the **5-As approach** (acceptability, applicability, accessibility, affordability, accuracy).*

Expected Impact of Common Priority 2

- **Reduced social isolation and loneliness** of older citizens
- Ensure **equitable access** to public services for older citizens regardless of their background
- **Increased digital literacy** of older citizens
- Improved healthcare system engagement for older persons
- **Improved offer of personalized care services**
- Expanded co-operation and knowledge sharing with EU and partner countries, also for **adaptation and replication** of successful models and tools **internationally**
- More inclusive strategies adopted for the engagement of older people in programmes of digital literacy for AHA

Common Priority 3 – Interoperability by design

To ensure **accessibility, sharing and protection of data** from different sources, such as IoT wearables and sensors through the **development of international standards**, and procedures and incentives for producers accessible for all countries based on an **interoperability-by-design** approach of **digital solutions for preventive and integrated care, independent and inclusive living of the older persons.**

➤ Expected Impact of Common Priority 3

- Facilitated access to tools with proven and validated program design from other countries and **enhanced collaboration on datasets**.
- **Enhanced evidence-based policy making** through knowledge exchange at international level, towards **standardization of key findings** and common approaches in the field.
- **Increased target groups participation** through **international** cooperation for better research outcomes and a **meaningful impact on societies**.
- Better outcomes in interoperability (at international level and among devices) will positively affect **Integrated Care** at country level.

Thank You!

IDIH Week 2022

- 4 days online event dedicated to researchers, innovators, care providers and user associations dealing with Digital Health for AHA.
- Information, Networking & Matchmaking, Co-creation sessions

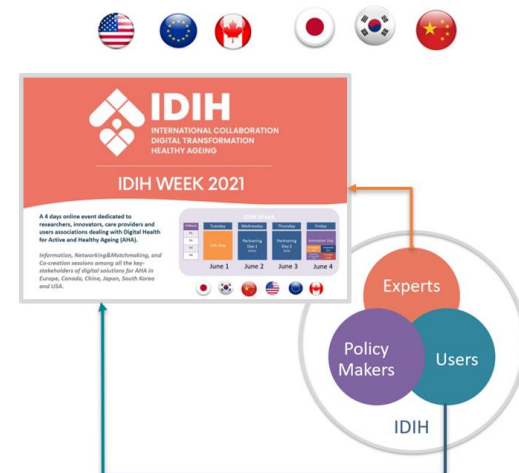

IDIH Long-term Matchmaking Platform

Networking among all key-stakeholders of digital solutions for AHA

Register at: <https://health-innovation-community-platform.b2match.io/page-1821>

Create your online profile specifying your Area of Activity and/or expertise request/offer in the Marketplace
Schedule B2B-meetings with your potential international partners, even *after* the IDIH Week 2022!

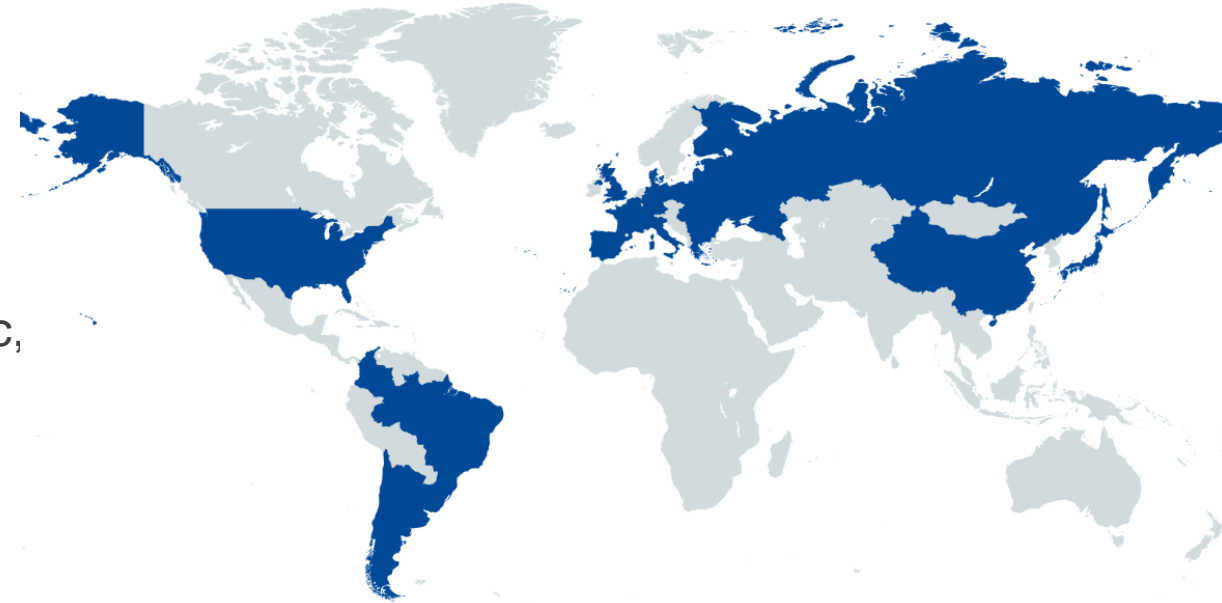

ENRICH
GLOBAL
TAKING EUROPEAN
INNOVATION GLOBAL

1

Introduction – ENRICH GLOBAL overview

- **Non-for-profit member-driven association founded in 2020 by 12 public and private organisations based around the world.**
- **Initiated by the members of ENRICH projects and other renowned organisations.**
- **Objectives:**
 - Contribute to the development of European scientific, technological and innovation excellence,
 - Reinforce innovation competitiveness and internationalisation,
 - Take European innovation global (and vice versa).

ENRICH GLOBAL coverage

ENRICH GLOBAL has for mission to **build a future for innovation-related international collaboration** by connecting organisations and existing initiatives and providing support to building sustainable collaborative programmes/projects or supporting their sustainability. This is achieved by:

- Supporting and coordinating collaboration between Initiatives and Multipliers within and outside of the European Union;
- Building collaborative programmes, services, network, and tools, or supporting them;
- Supporting sustainability efforts of collaborative initiatives such as ENRICH and others.

12 founding members: public and private organisations based around the world

Public National Agencies, Centres or Foundations:

Private and non-for-profit:

The General Assembly

reunites all members of ENRICH GLOBAL: it defines its general policy and approves the management and financial accounts every year.

The Board

is composed of maximum 15 persons (and composed of all the Founding Members for the first three years of ENRICH GLOBAL's existence) decides among other things on the implementation of the general policy, approves new members, elect the desk's members and control their management.

The Desk

is the executive management of ENRICH GLOBAL, responsible for the effective day-to-day functioning of the association in conformity with the general policy defined by the General Assembly and in application of the decisions of the Board.

PRESIDENT

Dr Svetlana KLESSOVA

*Director, Research and
Innovation Partnership, G.A.C.
Group, France*

**VICE-PRESIDENT FOR
EXPANSION**

Filipe Miguel CASSAPO

*President, ENRICH in LAC,
Brazil*

**VICE-PRESIDENT FOR
EDUCATION & SECRETARY**

Blandine CHANTEPIE-KARI

*Vice President, University &
Entrepreneurship – Soft Landing
Programs, EAEC, USA*

TREASURER

Marcela FLORES

*Executive Director, ANPEI -
National Association of
Research and Development of
Innovative Companies, Brazil*

ENRICH
GLOBAL
TAKING EUROPEAN
INNOVATION GLOBAL

Taking European Innovation Global through Thematic Groups

- ENRICH GLOBAL's Thematic Groups **bring together members of the association, but also experts and world-class actors**, contributing to international research, innovation, and business collaboration, who share the vision to provide **a unique collaborative platform** based on best internationalisation practices.
- Thematic Groups may be initiated by any member of the association and are moderated by them
- Thematic Group proposal template available in the ENRICH GLOBAL Teams
- To create a Thematic Group, interested members shall complete the appropriate template and inform the desk. The Thematic Group thus created will be presented to the next Board meeting
- Thematic Groups includes members of the association, but may also include external participants (International Forum, expert groups etc.), invited at the activities organized by the Thematic Group
- External participants can be invited at the discretion of Thematic Groups leaders for specific meetings

EU Projects & Sustainability

IDIH PROJECT | The value of cooperation

- Only **international cooperation** and global exchange of experiences, innovative approaches, best practices will relieve, strengthen, improve health systems in the longrun

Despite **divergent health care systems** around the world, countries can and should learn from each other. Every country has **specific strengths**:

-  US has a well-oiled investment system & is strong on transforming innovations into economic opportunities
-  Japan is very advanced in e.g. Robotics
-  China is advanced in high-performance computing
-  Japan and South Korea are excelling in proliferating mobile health solutions in their markets and beyond
-  Europe can leverage on privacy and data sharing through primary and secondary use.

- Concerted innovation and research, joint efforts and mutual learning for the benefit of the society and industry on a global level is vital.

[CSA – funded under SC1-H2020]

IDIH Short Fact Sheet

- Full Title:** International Digital Health Cooperation for Preventive, Integrated, Independent and Inclusive Living
- Start Date:** 1st May 2019
- Aim:** Promote and increase international collaboration to advance digital health in the EU and key Strategic Partner Countries to support active and healthy ageing (AHA) through innovation

9 Partners	4 EU Countries	5 Strategic Partner Countries	36 months <small>(May 2019 - April 2022)</small>	2.4 million € <small>(including partners' own contribution)</small>
---------------	-------------------	----------------------------------	--	---

A SUSTAINABILITY PLAN FOR THE IDIH OUTCOMES

- Digital Health Transformation Forum**, a key exploitable asset of the project, and its 4 Expert Groups (Preventive Care; Integrated care; Independent and connected living; Inclusive living) with engaged experts (in average 6 per group).
- IDIH Community**: the Long-term International Matchmaking Platform (B2Match) for networking among all key-stakeholders of digital solutions for AHA, a key exploitable asset of the project with a stakeholder community of 380+ stakeholders.
- Roadmap **“Towards an international collaboration in digital health, v. 2.0”** (D3.7), a key exploitable result of the project – both a complete, and a shorter more user-friendly version will be published. This is the final result of the work of the Digital Health Transformation Forum and the Expert Groups
- IDIH Users Consultation Group**: 7 members (5 regions represented)
- Programme Level Cooperation**: 13 policy makers/6 funding Agencies

Digital Health Transformation Forum

- Expected to become a long-lasting mechanism for international dialogue on exploitation of synergies, promising avenues, and open issues in digital health.
- Shall develop a Roadmap with concrete measures for enhancing collaboration in priority areas.

IDIH Expert Groups

Activities

- Collaborative actions
- Exchange in areas and topics of collaboration in digital health domains
- Ensure mutual learning and knowledge exchange between countries and regions

Experts

- Four Expert Groups (one per strategic topic)
- Experts coming from research, technology, industry, advocacy groups, etc.
- Experts were selected via application process

Four Strategic Topics

Preventive care	Integrated care	Independent and connected living	Inclusive living																																				
 <p>Focus: Early diagnosis and detection Active and healthy aging begins with a prolonged health regimen. Tech enabled solutions that engage users in health and wellness techniques will allow active and meaningful senior lifestyles.</p>	 <p>Focus: Using new technologies to redesign, coordinate and integrate health and social services and place citizens, patients and seniors at the centre of health systems. Technology in the integrated care domain is intended to provide support at the point of care, anytime and anywhere.</p>	 <p>Focus: Tele monitoring via smart home and living technologies Connected living is made possible through smart sensors and buildings, mHealth solutions, mobility aids, secure data, robotics, and e health</p>	 <p>Focus: Helping the elderly to feel socially more connected Healthy environments equal healthy individuals. In the aging population, a component of healthy living is inclusivity, promoting positive social engagement, and ensuring a rewarding social aspect to age</p>

Health Innovation Thematic Group: International Collaboration for Health Innovation

#Health #InternationalCooperation #Policies #Research&Innovation
#Digitalization #Ageing #Stakeholders Engagement

Background:

- The *Digital Health Transformation Forum* of the [IDIH](#) project - International Digital Health Cooperation for Preventive, Integrated, Independent and Inclusive Living
- The [SENET](#) project (EU-China collaboration)

In order to envisage a continuation of such *International Health Community* towards the enhancement of international cooperation in the field of Digital Health for AHA (and beyond), APRE is promoting with GAC (as co-proposer) to all other ENRICH Global members, a new ENRICH Global thematic group focused on **Health Innovation**, coordinated by APRE.

Health Innovation Thematic Group: International Collaboration for Health Innovation

#Health #InternationalCooperation #Policies #Research&Innovation
#Digitalization #Ageing #Stakeholders Engagement

Aim:

- Facilitate international cooperation and policy dialogue on global health issues by harnessing the networking potential and critical mass of ENRICH Global members and their projects.

Activities:

**Evidence-based policy making will be also favoured through the participation in the workshop of the R&I experts from the International Experts Forum for Health Innovation.*

International Experts Forum for Health Innovation
 establishment and management: this will be done by leveraging on the [IDIH Community of experts](#) +300 stakeholders. Activities and events engaging the Forum (1 Forum event per year, online) will be planned through a Bi-annual Plan.

- Target groups: *Researchers, Care providers, Users/Patients Associations, Health Tech providers, etc.*

International Policy Dialogue Workshops: (1 per year, online)
 to discuss about global Health challenges and compare Health policies, in a mutual learning and exchange environment that will also encourage eventual joint funding initiatives, to enhance international cooperation in specific sectors of Health*.

- Target groups: *Policy makers and funding agencies in the Health/R&I field*

FUTURIUM (by EC)

Active and Healthy Living in the Digital World is a multi-stakeholder forum of EU citizens, patients, health and care providers, government authorities, innovators, researchers, civil society and policy makers engaged in discussion, exchange and dissemination of innovations, policies and challenges related to active and healthy living and aging with digital tools.

International Cooperation

Part of Active and Healthy Living
in the Digital World

This platform focuses on
international cooperation in the
field of active and healthy aging.

What is the Futurium Platform?

- Futurium is a platform dedicated to Europeans discussing EU policies.
- Futurium has almost 30.000 members
- Reaching 8.000 monthly visitors
- 17 communities + 25 subgroups

Opportunities for IDIH regarding the Futurium Platform:

- Means to engage the wider IDIH community
- Institutional platform which serves to increase the impact of the Forum's work

Health Innovation Thematic Group: International Collaboration for Health Innovation

#Health #InternationalCooperation #Policies #Research&Innovation
#Digitalization #Ageing #Stakeholders Engagement

Preparatory and continuous activities:

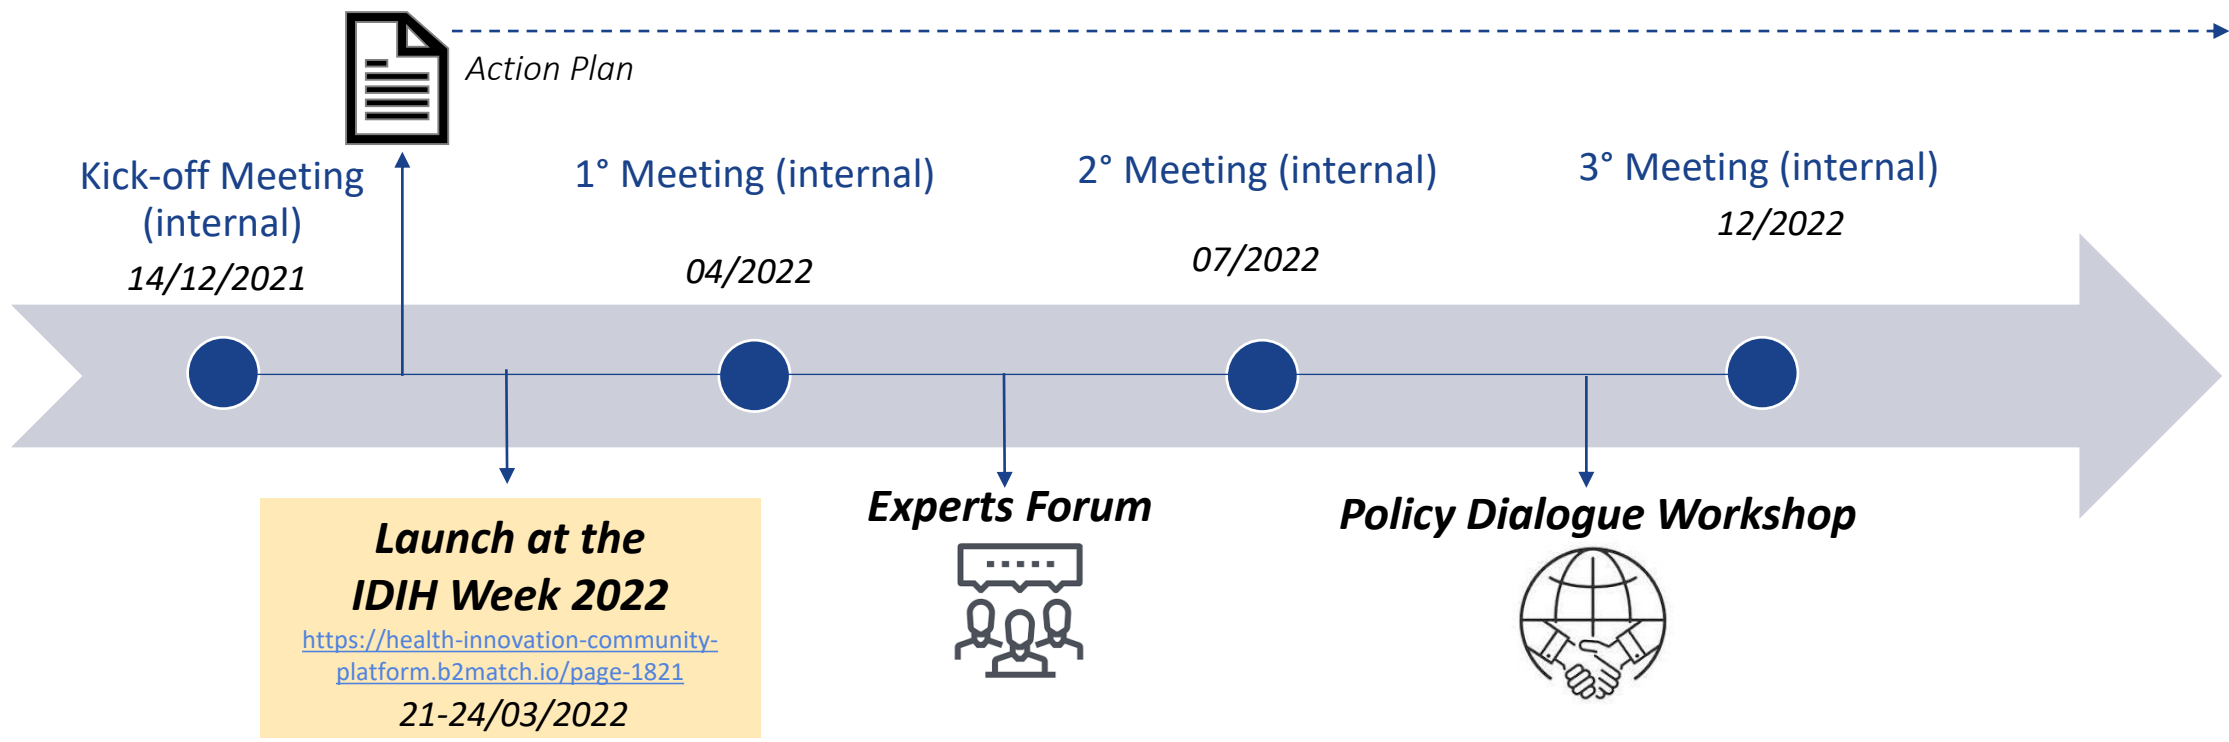

- *[preparatory]* Gathering Thematic Group members among ENRICH Global members (min. 3) ✓
- *[preparatory/1 per year]* **Mapping publications/findings/projects/networks/initiatives** within the Group
- *[preparatory/1 per year]* **Priority setting:** Health policies (e.g. European Health Union, Shaping Europe’s digital future, Europe’s Beating Cancer Plan, Green Paper on Ageing, Global Health Threats, etc.)
- *[preparatory/1 biannual]* Drafting an **Action Plan** ✓
- *[where possible/needed]* Drafting Publications/Reports

Scenario and perspectives for STI cooperation between Europe and LAC countries

DR. ANNEKEN REISE

ENRICH IN LAC

21 MARCH 2022

IDIH WEEK 2022

ENRICH - European Network of Research and Innovation Centres and Hubs

An initiative funded by the EU's Horizon 2020 Programme, aiming to promote collaborative opportunities for business and innovation players.

Objectives:

- Facilitate new European and LAC partnerships in business and innovation
- Build upon the ENRICH in Brazil activities (2017-2020)
- Expand its activities towards the whole LAC region
- Position itself as the **main and most reliable intermediary & knowledge centre in European-LAC-research based business and innovation collaboration**
- Become a financially sustainable non-profit association

ENRICH in LAC is a member of
ENRICH Global

*India,
China, ...*

ENRICH in LAC

Project partners & Associates

ENRICH IN LAC PROJECT

**ENRICH
ASSOCIATION**

(> 30 ASSOCIATES)

Executive Education & Capacity Building

High-level learning opportunities to engage in exclusive sessions with top-ranked institutions. Expand your business mindset with a range of **workshops, webinars and training** especially designed to explore the hot topics of innovation.

Access to Funding Information

Access to funding information on Research Technology and Innovation national funding opportunities for **international cooperation in Europe and Latin America**.

Networking & Matchmaking

Establishment of high-level connections with leading European and Latin American institutions that are shaping up the innovation ecosystem through our **MATCHMAKING PLATFORM**.

Soft-Landing and Acceleration services

Accredited partners for a smooth entrance into the Latin American and Caribbean market, through **localisation guidance, space offer, administrative support and compliance checks**.

Development of **Strategic Partnerships in 5 Latin American Countries** (Argentina, Brazil, Chile, Columbia, Uruguay)

Services conducted

1628 participants receiving ENRICH in LAC services

13.526 Unique Website Views

2 Trainings on Foresight and Technology Planning conducted

36 Members associated with ENRICH in LAC in total at the end of 2021

Satisfaction Rate

91,6%

Demographic challenges:

- LAC is one of the fastest aging geographic regions in the world
- proportion of citizens >65 will more than double until 2050
- shift from causes of mortality toward chronic diseases
- unhealthy lifestyles
- rising obesity

General challenges

- unequal distribution of economic income
- segments of the population without access to health
- other groups have comparable health figures with the developed world
- restricted access to remote regions

Source

Forecast

- the LAC digital health market is progressing at an active annual growth rate
- health apps are increasingly used for online consultation
- remote monitoring services are fuelling the market
- Brazilian digital health market is playing a leading role

Concrete needs

- achieve interoperability standards in the region
- epidemiological surveillance possibilities
- adequately trained health professionals
- e-health training programs for professionals (e.g. in isolated areas)
- further development of the telemedicine / teleconsultation sector
- policy level: development of digital agendas / legal framework in collaboration with the participation of NGOs, academia and industry
- legal and ethical considerations, data protection issues

Source

Our focal partner in LAC: FIOCRUZ

The Oswaldo Cruz Foundation is the most prominent Institution of science and technology in health in Latin America, based in Rio de Janeiro, Brazil and holding a lab in the EU at the Universidade de Aveiro, Portugal.

Organized by the EU-LAC Interest Group, founded in 2017

- 29 funding agencies from Latin America, the Caribbean and the EU MS & AC

Benefits:

- Active engagement in transnational EU-LAC STI projects in addition to Horizon Europe
- Opportunity of building networks / finding research partners at intraregional and bi-regional level

2 Health topics:

- Personalised Medicine
- EU-LAC Regional Hubs: Integrating Research infrastructures for Health and Disease

Application deadline: Thursday, 28th April 2022 (17.00 CEST)

Participating countries:

1. Austria: Bundesministerium für Bildung, Wissenschaft und Forschung, BMBWF
2. Bolivia: Ministerio de Educación - Vice Ministerio de Ciencia y Tecnología, MINEDU
3. Brazil: Conselho Nacional de Desenvolvimento Científico e Tecnológico, CNPq
4. Brazil: Brazilian National Council of State Funding Agencies, CONFAP
5. Dom. Rep.: Ministerio de Educación Superior, Ciencia y Tecnología, MESCyT
6. Germany: Bundesministerium für Bildung und Forschung, BMBF
7. Italy: Consiglio Nazionale delle Ricerche, CNR
8. Panama: Secretaria Nacional de Ciencia, Tecnología e Innovación, SENACYT
9. Peru: Consejo Nacional de Ciencia Tecnología e Innovación Tecnológica, CONCYTEC
10. Poland: Narodowe Centrum Badań i Rozwoju, NCBR
11. Portugal: Fundação para a Ciência e a Tecnologia, FCT
12. Spain: Instituto de Salud Carlos III, ISCIII
13. Spain: Agencia Estatal de Investigación, AEI
14. Turkey: Türkiye Bilimsel ve Teknolojik Araştırma Kurumu, TÜBİTAK
15. Uruguay: Agencia Nacional de Investigación e Innovación, ANII

ONE PROGRAMME, TWO APPROACHES:

Bottom-up: it concerns those funding schemes that are open to any R&I idea and topic from the applicants.

Top-down: it concerns those funding schemes in which applicants are asked to respond exactly to the topic described by the EC Commission Work Programme.

HORIZON EUROPE

WHO CAN PARTICIPATE

- Participation is open to any legal entity, regardless of their place of work, including legal entities from third countries not associated with the Program or international organizations, except for any different provision set out in the Work Program or in specific Calls. In the vast majority of collaborative projects, the consortium must be composed of **at least three independent legal entities established in a different Member State or Associated Country**. Furthermore, **at least one of the entities must be established in a Member State**.

WHO CAN BE FUNDED

- Legal entities established in a Member State or an Associated Country can be **financed**. Entities based in a non-associated third country must independently bear the cost of their participation in Horizon Europe. Entities established in non-associated low-middle income third countries and, exceptionally, in other non-associated third countries, can be financed if:
 - The third country is identified in the Work Program adopted by the European Commission; or
 - The European Commission or the funding body considers that the participation of the concerned entity is essential for the implementation of the project.

HORIZON EUROPE | (Main) Types of Actions

Research and Innovation Actions (RIA)

- Activities that aim to create new knowledge and/or explore the feasibility of a new or improved technology, product, process, service or solution. They therefore include **basic and applied research**, development and integration of technology, testing, demonstration and validation on a small-scale prototype, in a laboratory or simulated environment.

100%

Innovation Actions (IA)

- Activities aimed at plan and design new, altered or improved products, processes or services, possibly including **prototyping, testing, demonstration, piloting, large-scale product validation and market replication**.

100%
70% for-profit

Coordination and Support Actions (CSA)

- Activities which contribute to the objectives of the program and which are **not research and innovation activities** in the strict sense.

100%

HORIZON EUROPE | (Main) Types of Actions

HORIZON EUROPE | Types of actions³⁶

Research and Innovation Actions (RIAs)

- **EU funding rate: 100%**
- **Description:** Activities aiming to establish new knowledge and/or to explore the feasibility of a new or improved technology, product, process, service or solution. For this purpose they may include basic and applied research, technology development and integration, testing and validation on a small-scale prototype in a laboratory or simulated environment. Projects may contain closely connected but limited demonstration or pilot activities aiming to show technical feasibility in a near to operational environment.

(!) In case of Research and Innovation Lump Sum actions (RIA-LS), funding for grants awarded will take the form of **lump sums**. For more information on the specificities of Lump Sum actions in H2020, see the [video](#) or check the [presentation](#).

Innovation Actions (IAs)

- **EU funding rate: 70%** (except non-profit, which are still funded 100%)
- **Description:** Activities directly aiming at producing plans and arrangements or designs for new, altered or improved products, processes or services. For this purpose they may include prototyping, testing, demonstrating, piloting, large-scale product validation and market replication.

(!) In case of Innovation Lump Sum actions (IA-LS), funding for grants awarded will take the form of **lump sums**. For more information on the specificities of Lump Sum actions in H2020, watch the [video](#) or check the [presentation](#).

Coordination and support actions (CSAs)

- **EU funding rate: 100%**
- **Description:** Accompanying measures such as standardisation, dissemination, awareness-raising and communication, networking, coordination or support services, policy dialogues and mutual learning exercises and studies.

(!) In case of Coordination and support Lump Sum actions (CSA-LS), funding for grants awarded will take the form of **lump sums**. For more information on the specificities of Lump Sum actions in H2020, see the [video](#) or check the [presentation](#).

BEYOND PILLAR 2 | PILLAR 1

Strengthen and extend the excellence of the Union's science base

ERC – European Research Council	MSCA - Marie Skłodowska- Curie Actions	Research Infrastructures
Frontier research carried out by the best researchers and their groups	Researchers' Mobility and Training to provide them with new knowledge and skills	Integrated and interconnected world-class research infrastructures
<ul style="list-style-type: none"> ▪ <i>Excellence as the only criterion,</i> ▪ <i>Support for the individual scientist – no networks!</i> ▪ <i>Global peer-review</i> ▪ <i>Bottom-up, all fields of science</i> 	<ul style="list-style-type: none"> ▪ <i>Bottom up, open to all domains of R&I</i> ▪ <i>Open to the whole world</i> ▪ <i>Supervision, mentoring, career guidance and career development</i> ▪ <i>Participation of both academic and non- academic (private) sector organisations</i> 	<ul style="list-style-type: none"> ▪ <i>Enabling an operational European Open Science Cloud (EOSC) ecosystem</i> ▪ <i>For frontier research and for challenge- driven research (e.g. health research, and green and digital transformation)</i>
€ 16.8 billion (current prices)	€ 6,9 billion (current prices)	€ 2,5 billion (current prices)

Marie Skłodowska-Curie Actions (MSCA) is a programme that intends to facilitate cross-border and cross-sector mobility and training of researchers. The MSCA are the **main instrument at EU-level for attracting researchers from third countries to Europe**, thus making a major contribution to global cooperation in research and innovation.

Cluster 1 Health

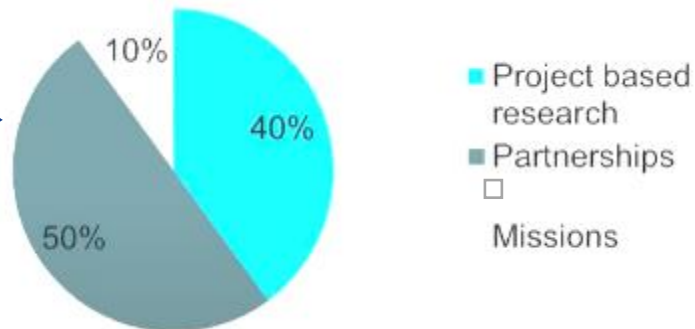

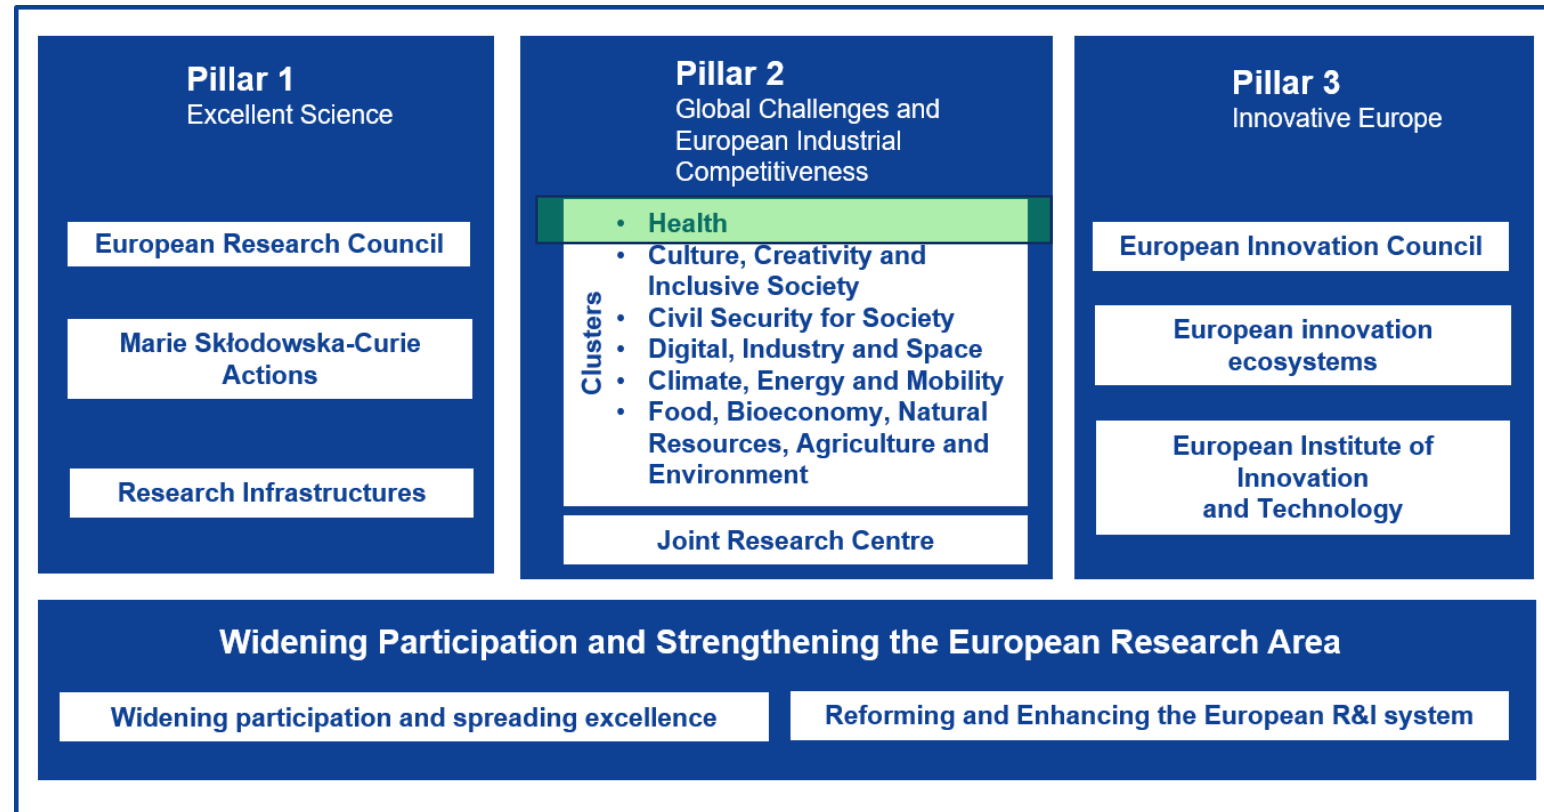

HORIZON EUROPE (2021 – 2027)

€ 95,5 billion

Pillar 2: € 53,52 bn

Health: € 8,25 bn

(15% of all Clusters)

SPECIFIC OBJECTIVES

Cluster Health

CLUSTER 1. Health

*Improving and protecting the health of citizens at all ages, by developing innovative solutions to **prevent, diagnose, monitor, treat and cure** diseases; mitigating health risks, protecting populations and promoting good health; making **public health systems** more cost-effective, equitable and sustainable; and supporting and enabling patients' participation and **self-management**.*

Areas of intervention

- ↗ Health throughout the life course
- ↗ Non-communicable and rare diseases
- ↗ Tools, technologies and digital solutions for health and care, including personalised medicine
- ↗ Environmental and social health determinants
- ↗ Infectious diseases, including poverty-related and neglected disease
- ↗ Health care systems

EC Policy priorities for Cluster 1 Health

- Directive on patients' rights in **cross-border healthcare**;
- Political declaration on prevention & control of **non-communicable diseases**;
- Europe's beating **cancer plan**
- Commission Communication on effective, accessible and resilient **health systems**;
- Commission Communication on upgrading the **single market** (and its proposed health technology assessments initiative);
- Council conclusions on **nutrition and physical activity**;
- Council conclusion on **personalized medicine and pharmaceuticals**;
- Council conclusions on strengthening the balance in the pharmaceutical systems in the EU and its Member States;
- EU One Health Action Plan against **Antimicrobial Resistance**; Ostrava Declaration on Environment and Health;
- Commission Communication on the **digital transformation** of health and care;
- Council recommendation on strengthened cooperation against **vaccine preventable diseases**;
- Commission Communication 'European Plastics Strategy for a Circular Economy, Commission Communication 'Towards a Comprehensive European Union Framework on Endocrine Disruptors';
- Commission Communication 'European Union Strategic Approach to **Pharmaceuticals in the Environment**';
- EU decision on a General Union Environment Action Programme to 2020 'Living well, within the limits of our planet'

WORK PROGRAMME “HEALTH” 2021-2022

6 Destinations

- 1. Staying Healthy in a rapid changing society**
- 2. Living and working in a health-promoting environment**
- 3. Tackling diseases and reducing disease burden**
- 4. Ensuring access to innovative, sustainable and high-quality health care**
- 5. Unlocking the full potential of new tools, technologies and digital solutions for a healthy society**
- 6. Maintaining an innovative, sustainable and globally competitive health industry**

CLUSTER HEALTH | DESTINATION 1

🏠 Staying healthy in a rapidly changing society

- Focus on major societal challenges that are part of the European Commission's political priorities, notably **diet and health** (obesity), **ageing and demographic change**, mental health, **digital empowerment** in health literacy, and **personalised prevention**.
- New evidences, methodologies and tools for understanding the transition from health to disease.
 - *Budget: 289 mill Eur*

Health throughout the Life Course

Environmental and Social Health Determinants

TOPICS 2022:

- ✓ Personalised blueprint of **chronic inflammation** in health-to-disease transition – RIA

Deadline: 21 April 2022 – SINGLE STAGE

CLUSTER HEALTH | DESTINATION 2

Living and working in a health-promoting environment*

- Understanding of the impacts on our health and well-being of those **environmental, occupational and socio-economic risk factors** that have the most significant or widespread societal impacts.
- **Indoor and outdoor air pollution**, chemicals, **non-ionizing radiation** (electromagnetic fields), **urbanisation**, climate and other environmental changes, **socio-economic inequalities**, and changing **working environments**.

Budget: 350 mill Eur

* Strong link with European Green Deal

Health throughout the Life Course

Environmental and Social Health Determinants

TOPICS 2022:
✓ Methods for assessing **health-related costs of environmental stressors** – RIA

Deadline : 21 April 2022 – SINGLE STAGE

CLUSTER HEALTH | DESTINATION 3

Environmental and Social Health Determinants

Non-communicable and Rare Diseases

Infectious diseases

🏠 Tackling diseases and reducing disease burden

- Cancer and other non-communicable diseases, better diagnosis and treatment of rare diseases, preparedness and response to and surveillance of health threats and epidemics, antimicrobial-resistant infections, vaccination, demographic change, mental health and digital empowerment in health literacy.

Budget: 490 mill Eur

* Links with [Europe's Beating Cancer Plan](#) and [EU4Health Programme](#)

TOPICS 2022:

- ✓ **Pandemic preparedness** - RIA
- ✓ **Non-communicable diseases** risk reduction in adolescence and youth (Global Alliance for Chronic Diseases - GACD) - RIA
- ✓ Support for the functioning of the **Global Research Collaboration for Infectious Disease Preparedness** (GloPID-R) – CSA
- ✓ European partnership fostering a European Research Area (ERA) for health research – Programme Co-fund Action

Deadline: 21 April 2022 – SINGLE STAGE

CLUSTER HEALTH | DESTINATION 4

Ensuring access to innovative, sustainable and high-quality care*

- Modernising health care systems in the EU, improving the **quality of health care** along the entire health care continuum and being people-centred, supporting **evidence-based health care decisions**, enhancing **development and uptake of innovative health care services and solutions**.

Budget: 240 mill Eur

* Synergies with [EU4Health Programme](#)

Health throughout the Life Course

Tools, Technologies and Digital Solutions for Health and Care

Health Care Systems

TOPICS 2022:

- ✓ Pre-commercial research and innovation procurement (PCP) for building the resilience of **health care systems in the context of recovery** - PCP
- ✓ Public procurement of innovative solutions (PPI) for building the resilience of **health care systems in the context of recovery** – PPI
- ✓ Better **financing models for health systems** – RIA
- ✓ European partnership on **transforming health and care systems** – Programme Co-fund Action

Deadline: 21 April 2022– SINGLE STAGE

CLUSTER HEALTH | DESTINATION 5

Tools, Technologies
and Digital Solutions
for Health and Care

🔑 Unlocking the full potential of new tools, technologies and digital solutions for a healthy society

- Promote the **development of tools, technologies and digital solutions** for treatments, medicines, medical devices and improved health outcomes, taking into consideration safety, effectiveness, appropriateness, accessibility, comparative value-added and fiscal sustainability as well as issues of ethical, legal and regulatory nature.

Budget: 270 mill Eur

* [!] European Health Data Space to promote the exchange of health data and international research.

TOPICS 2022:

- ✓ Optimizing effectiveness in patients of existing **prescription drugs for major diseases** (except cancer) with the use of biomarkers - RIA
- ✓ New methods for the effective use of real-world data and/or synthetic data in **regulatory decision-making and/or in health technology assessment** – RIA

Deadline: 21 April 2022– SINGLE STAGE

CLUSTER HEALTH | DESTINATION 6

➤ Maintaining an innovative, sustainable and globally competitive health industry

- Adoption of **technologies and innovations able to integrate key players** on the value chain.
 - EU health industry more competitive, sustainable and strategically autonomous.

Budget: 113 mill Eur

Health Care Systems

Tools, Technologies and Digital Solutions for Health and Care

TOPICS 2022:

- ✓ Enhancing **cybersecurity** of connected medical devices - RIA
- ✓ Scaling up **multi-party computation, data anonymization techniques, and synthetic data generation** – RIA
- ✓ **New pricing and payment models** for cost-effective and affordable health innovations – RIA
- ✓ Setting up a **European Smart Health Innovation Hub** – CSA
- ✓ Setting up a **European Electronic Health Record Exchange Format (EEHRxF) Ecosystem** - CSA

Deadline : 21 April 2022 – SINGLE STAGE

EU | International Cooperation

- ▮ **Collaborative research and innovation initiatives**, including **targeted initiatives and projects** with partners from key third countries and regions in strategic areas of mutual benefit under all clusters, including the Missions and the European Partnerships.
- ▮ **International mobility and cooperation in frontier research** and support to brain circulation and the internationalisation of EU innovative companies, **in particular through activities in Pillars I and III**.
- ▮ **EU participation and leadership in multilateral alliances**, such as those related to tackling climate change, sustainable food and nutrition security, biodiversity decline, environmental degradation, global health issues, e.g. antimicrobial resistance, infectious diseases, and other threats to global health, gaining access to and sharing research and observation data, and **taking account of international collaboration programmes between European countries and third countries**.
- ▮ **Policy dialogues with third countries and regions** aiming at **reinforcing at a strategic level the cooperation in research and innovation**, including by the promotion of open science policies and the development of commonly accepted approaches to research ethics and integrity, as well as safety and quality standards and the life-cycle assessment of materials, the regulatory context of manufacturing, digital technologies, and consumer products and services.

▮ **Main areas for international cooperation in HEALTH** and activities to be aligned with R&I of third countries/regions at major scale or to be carried out in cooperation with organizations in third countries:

- *Infectious diseases, antimicrobial resistances and public health emergencies*
- *Global Health*
- *Personalised medicine*
- *Chronic diseases*
- *Cohorts-based clinical studies of health and diseases*
- *Brain and Mental Health*
- *Impact of the environment on human health*
- *Improving access, sustainability and quality of health care in low- and middle-income countries (LMICs)*

EU PARTNERSHIP | HEALTH

■ Institutionalized Partnerships:

- Innovative Health Initiative (2021) (ex-IMI2)
- European Partnership for EU-Africa Global Health (2021) (ex-EDCTP2)

■ Co-funded Partnerships:

- European Partnership for the Assessment of Risks from Chemicals (PARC) (2021)
- European Partnership Fostering an ERA for Health research (2022)
- **European Partnership on Transforming Health and Care Systems** (2022)
- European Partnership for Personalised Medicine (2023)
- European Partnership on Rare Diseases (2024)
- European Partnership for One Health/AMR Antimicrobial Resistance (AMR) (2024/25)

Draft proposals of the candidates for European Partnerships in Health:

https://ec.europa.eu/info/horizon-europe/european-partnerships-horizon-europe/candidates-european-partnerships-health_en

BEYOND HORIZON EUROPE | EU4Health – 4 general objectives

EU4health

EU4Health will be implemented along ten specific objectives that identify key areas of intervention

- Disease prevention & health promotion;
- International health initiatives & cooperation.

Improve & foster health in the Union

- Prevention, preparedness & response to cross-border health threats;
- Complementing national stockpiling of essential crisis-relevant products;
- Establishing a reserve of medical, healthcare & support staff.

Protect people from serious cross-border health threats

- Enhancement of availability, accessibility & affordability of medicinal products, medical devices and crisis-relevant products

Improve access to medicinal products, medical devices, crisis-relevant products

- **Strengthening health data, digital tools & services, digital transformation of healthcare;**
- Enhancing access to healthcare;
- Developing and implementing EU health legislation and evidence-based decision making;
- Integrated work among MS health systems.

Strengthen health systems

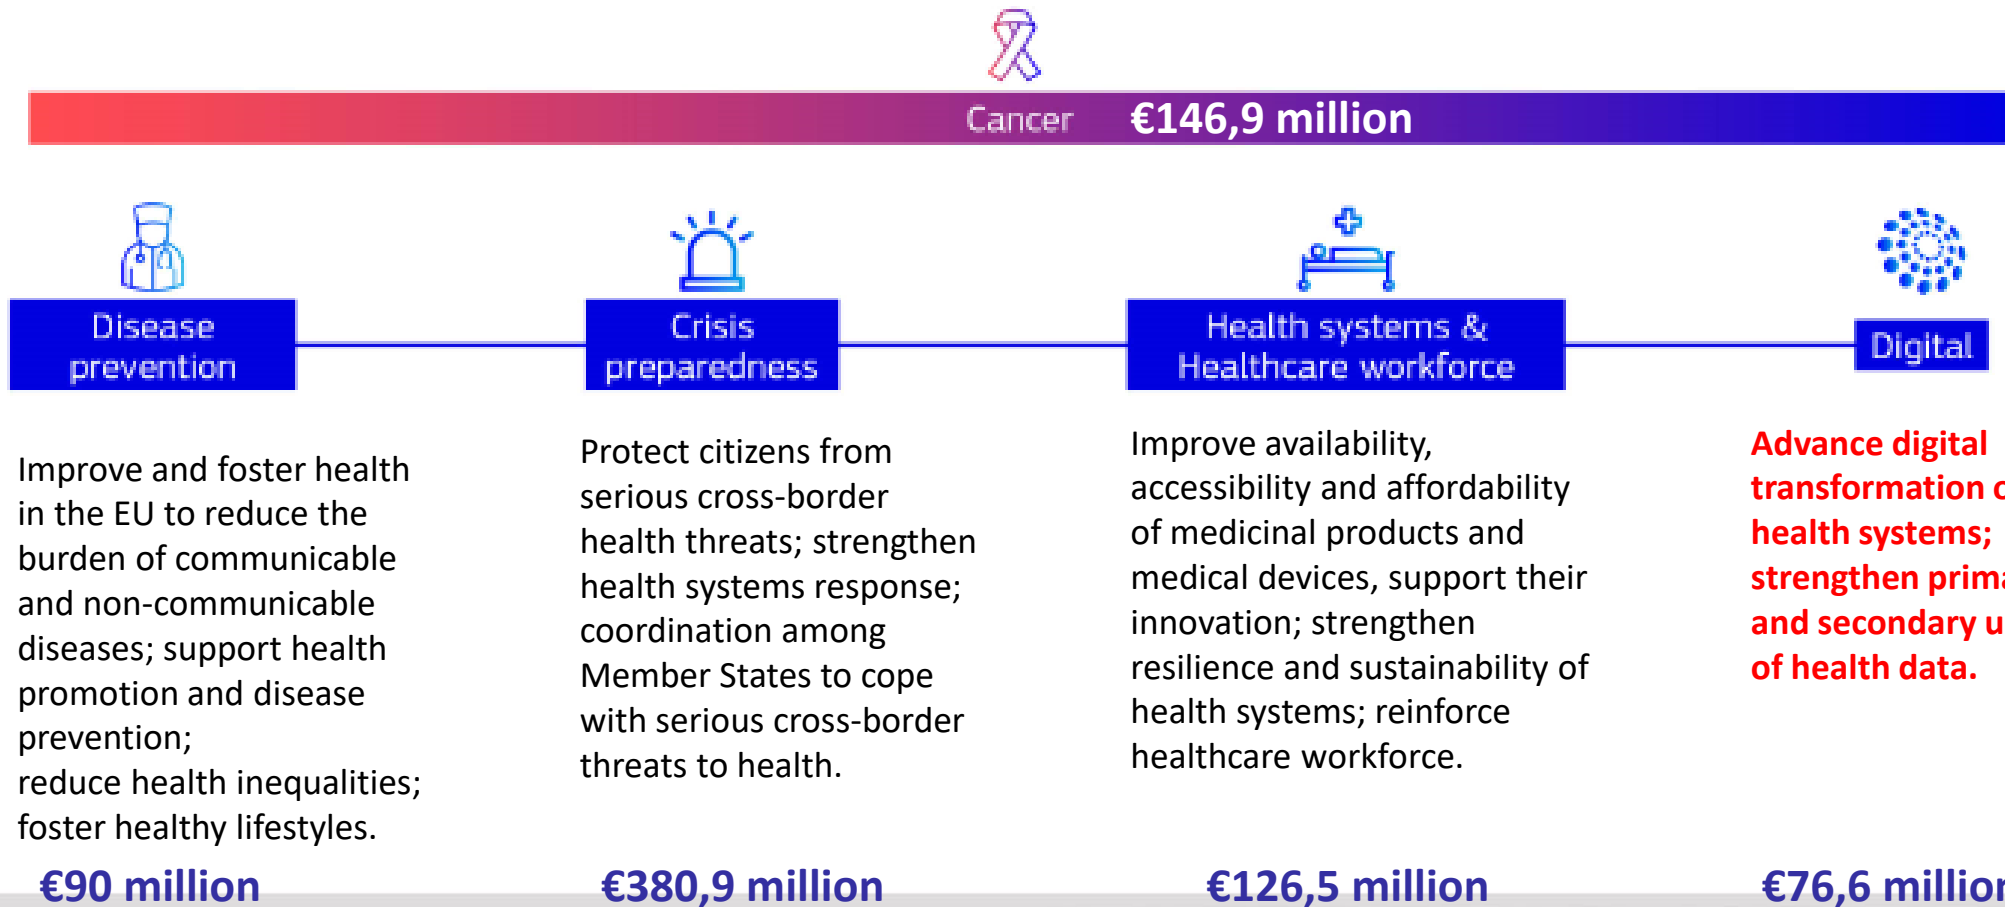

BEYOND HORIZON EUROPE | EU4Health – Strands of Action

EU4health

EU4Health supports **a broad range of actions** under the following overarching “strands” with a cross-cutting focus on cancer

BEYOND HORIZON EUROPE | EU4Health – Eligible Entities

EU4health

Any **legal entity** established in a **Member State** or an overseas country or territory linked to it and any legal entity created under Union law or as an **international organisation**

Any legal entities established in a **third country associated** with the Programme or non-associated (exception)

Any legal entity established in a **third country listed in the annual work programme** in accordance with the specific rules of the EU4Health Regulation

Natural persons are not eligible for grants under the EU4Health Programme!

BEYOND HORIZON EUROPE | EU4Health – Calls

EU4health

- 🔗 Calls published on the EU portal: Funding & tender opportunities/
Single Electronic Data Interchange Area (SEDIA).

Calls available [HERE!!!](#)

- 🔗 *Opening date:* 22 February 2022
- 🔗 *Deadline date:* **24 May 2022** at 17:00:00 Brussels time
- 🔗 [Work Programme 2022](#)

COST | Networking and Cooperation in Science & Technology

COST is a funding organisation for the creation of research networks, called **COST Actions**. These *networks* offer an open space for collaboration among scientists across Europe (and beyond) and thereby give impetus to research advancements and innovation.

COST funding intends to complement national research funds, as they are exclusively dedicated to cover collaboration activities, such as *workshops, conferences, working group meetings, training schools, short-term scientific missions, and dissemination and communication activities*.

WHAT

COST | Main features

- COST is *bottom-up*, this means that researchers can create a **network** – based on their own research interests and ideas – by submitting a proposal to the COST Open Call. *The proposal can be in any science field*. COST Actions are highly interdisciplinary and open.
- It is possible to **join on-going Actions**, which therefore keep expanding over the funding period of four years.
- **Actions** are multi-stakeholder, often involving the private sector, policymakers as well as civil society.

HOW

COST | Networking and Cooperation in Science & Technology

A COST Action is open to all:

- **science and technology fields** (including trans-, and interdisciplinary, new and emerging fields);
- **institutions** (academia, public institutions, SME/industry, NGO, European/international organisations, etc.);
- **career stages** (both young and experienced);
- COST Members

All the rules for participation in and implementation of COST activities are available [here](#).

Non-COST Members are spread across the Near-Neighbour Countries and International Partner Countries and can join on the basis of mutual benefit.

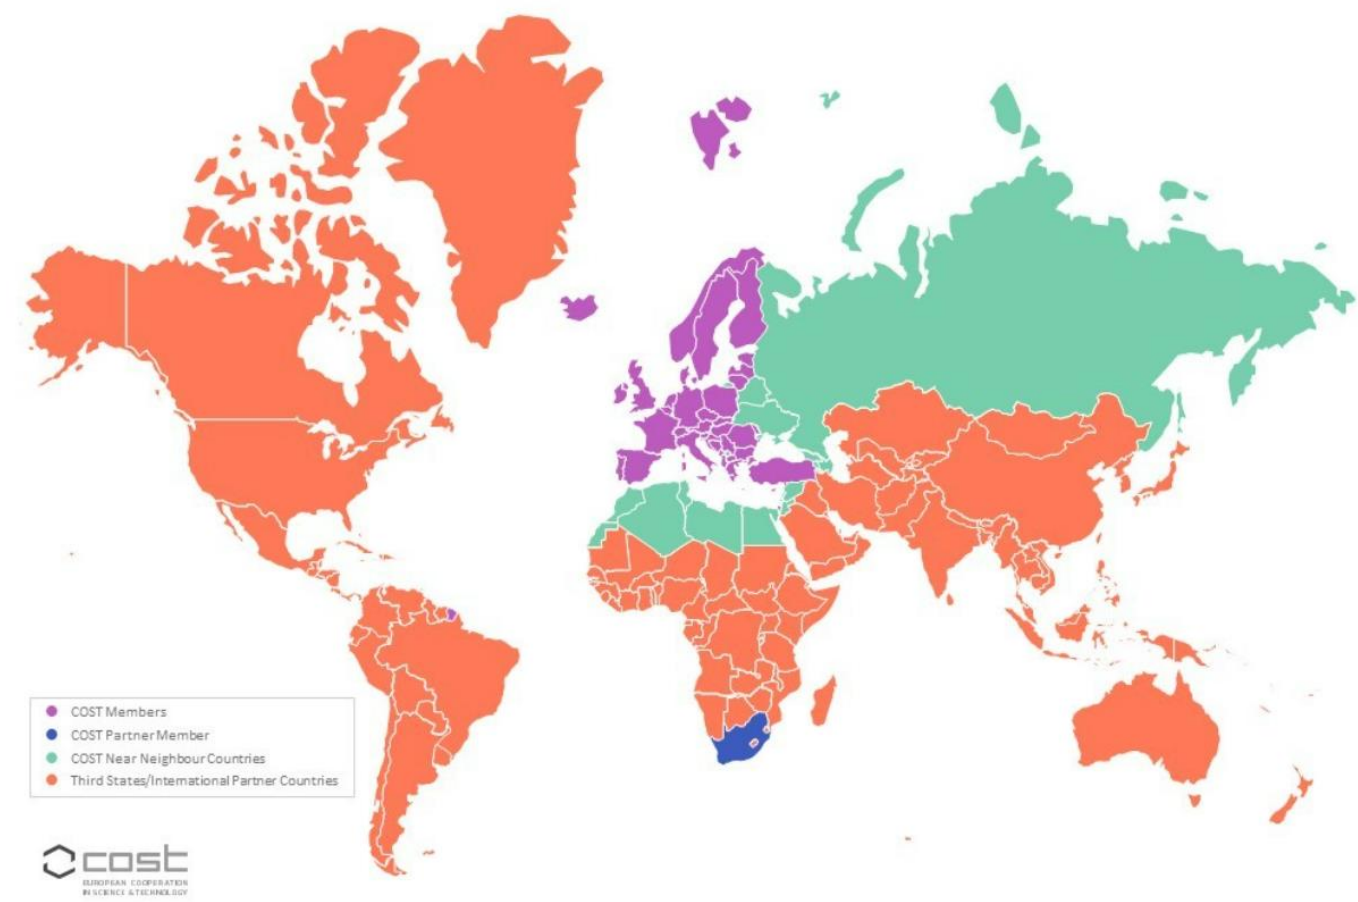

All the rules for participation in and implementation of COST activities are available [here](#).

COST | Networking and Cooperation in Science & Technology

🏠 COST International Partner Country (IPC)

- 🇺🇸
- 🇯🇵
- 🇨🇳
- 🇰🇷
- COST Actions are open to global cooperation and welcome researchers from IPCs to participate on the basis of ascertained mutual benefit, subject to approval.

WHO

COST | Networking and Cooperation in Science & Technology

Now [40 new COST Actions](#) have recently started.

43% of all Actions cover at least two OECD (Organisation for Economic Co-operation and Development) fields of science and technology, while 13% cover at least three fields, clearly highlighting the **multidisciplinary** of the new Actions.

This year, 45% of the main proposers are **women**.

Natural sciences lead the way as the most represented field of science (represented in 45% of the Actions), followed by **engineering and technology** (40%), **medical and health sciences** (25%), social sciences (23%), agricultural sciences (18%) and humanities (8%).

Join a COST Action!

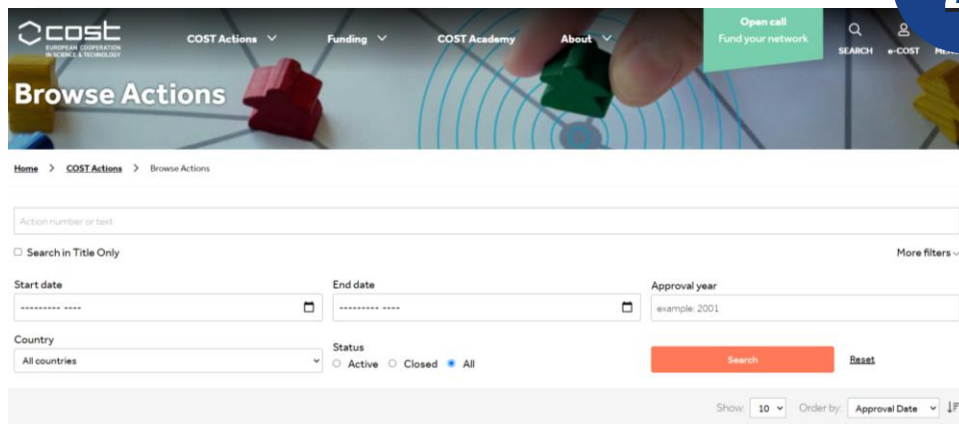

COST | How to participate

<https://www.cost.eu/funding/how-to-get-funding/>

The next collection date **will be 20 October 2022 at 12:00 noon (CET)** – *IM... please made using the new Technical Annex template.

1

Find out how to join an existing COST Action

2

More information : COST OPEN CALL – SUBMISSION, EVALUATION, SELECTION AND APPROVAL (SESA) GUIDELINES

Join a COST Action!

Approval process for International Partner Country participants

- Letter of intent from the IPC researcher, based on mutual benefit, to the Action Chair
- Internal approval procedure (appr 20 days)
- Applicant becomes an observer of the Action Management Committee
- The request for joining an Action is made by the individual researcher

Keep searching your partner in Horizon Europe thanks to NCPs!

IDIH | Long-term matchmaking platform

🔗 Open at: <https://idih-week-2021.b2match.io/>

🔗 +380 international stakeholders of *Digital Health for Active and Healthy Ageing* (32% Universities, 30% Companies, 9% R&D Institutions)

Beyond the IDIH Week 2021!

Join the IDIH long-term matchmaking platform!

Networking&Matchmaking among all the key-stakeholders of digital solutions for Active and Healthy Ageing (AHA) in Europe, Canada, China, Japan, South Korea and USA.

As part of the activities of the European project IDIH - International Digital Health Cooperation for Preventive, Integrated, Independent and Inclusive Living, the *IDIH Week 2021* has been a 4 days online event dedicated to researchers, innovators, care providers and users associations dealing with Digital Health for AHA.

Information, Networking&Matchmaking, and Co-creation sessions have been held between June 1 and June 4, involving the key-stakeholders of digital solutions for AHA in Europe and beyond, reaching organizations from Canada, China, Japan, South Korea, USA, and more!

Stakeholders in the field, from all around the world, created their online profile specifying their Area of Activity and/or their expertise request/offer in the Marketplace of the IDIH Week b2match platform.

The platform is now OPEN AGAIN as a long-term matchmaking platform!

So, if you are already registered, you can keep schedule and have meetings with your potential international partners whenever you like until December 31, 2021.

If you are not registered yet, you can do it [here](#), then - after creating your online (always editable) profile - you will be enabled to browse the Participants Catalogue and the Marketplace, and request/accept meetings that can be realized via the platform until December 31, 2021.

How to schedule and have a meeting? It's easy! Visit the page [B2B | How it works](#), you will find step-by-step instructions.

[!] FURTHER GUIDANCE ON HOW TO HAVE B2Bs. Check [these instructions](#) that may help you to access the video conference call directly in the b2match platform.

EU Global Health Initiatives | Multi-lateral health research activities

Transatlantic Taskforce on Antimicrobial Resistance (TATFAR)

- While significant progress has been made, concern related to AMR continues to escalate. In October 2015, TATFAR revised its work plan and extended the collaboration for an additional five years (2016-2020).
- In 2021, TATFAR members developed and are soon to adopt a new work plan for collaboration to continue through 2026.
- The taskforce will continue with **11 actions** and establish **7 new actions** for collaboration.

TATFAR's technical experts from **Canada**, the **European Union (EU)**, **Norway**, the United Kingdom (**U.K.**), and United States (**U.S.**) collaborate and share best practices to strengthen domestic and global efforts in four Key Areas.

Key Areas of Focus to Reduce the Threat of AMR

- Appropriate antimicrobial use in human and veterinary medicine
- Surveillance and prevention of AMR
- Strategies to improve financial incentives, access, research, and development of antimicrobial drugs, diagnostics, and alternatives
- Cross-cutting actions to improve awareness and disseminate information from TATFAR

EU Global Health Initiatives | Multi-lateral health research activities

Transatlantic Taskforce on Antimicrobial Resistance (TATFAR)

The taskforce is co-chaired by the Director of the European Commission Public Health Directorate and U.S. Director of the Pandemics and Emerging Threats Office, Office of Global Affairs, Health and Human Services.

Consultation, External Interaction, and Workshops: The members of the taskforce will seek, where appropriate, to obtain input from the public, interested experts, likeminded groups, and other stakeholders, in accordance with each members' respective process for obtaining public comment, on the specific activities within the framework of the Declaration where member collaboration can be most fruitful. As feasible, meetings to which public participation is invited will be conducted. Where possible, TATFAR will exchange information on progress with corresponding initiatives run by other international organizations working in the same area.

TATFAR's technical experts from **Canada**, the **European Union (EU)**, **Norway**, the United Kingdom (**U.K.**), and United States (**U.S.**) collaborate and share best practices to strengthen domestic and global efforts in four Key Areas.

Key Areas of Focus to Reduce the Threat of AMR

- Appropriate antimicrobial use in human and veterinary medicine
- Surveillance and prevention of AMR
- Strategies to improve financial incentives, access, research, and development of antimicrobial drugs, diagnostics, and alternatives
- Cross-cutting actions to improve awareness and disseminate information from TATFAR

EU Global Health Initiatives | Multi-lateral health research activities

International Initiative for Traumatic Brain Injury Research (InTBIR)

InTBIR is a cooperative effort of the European Commission (EC), the Canadian Institutes of Health Research (CIHR) and the National Institutes of Health (NIH) to coordinate and leverage clinical research activities on traumatic brain injury (TBI) research

- The role of the funding agencies in this effort will be to enable the open science environment by:
 - providing support for the continuation of the **InTBIR Work Groups** (*Biomarkers/Neuroimaging/Data management & Analytics/Policies*)
 - encouraging and providing logistical support for **in-person meetings**
 - informing participants of funding and/or scientific opportunities** within their agency.
- As the size and complexity of the InTBIR datasets increase and data sharing efforts advance, there will be a need for funders to consider appropriately sourcing these activities, e.g. to allow for recruiting multi-disciplinary researchers (e.g., bioinformatics, health economist) to assist in the analysis and interpretation of these complex data.

Join InTBIR

If you are associated with a Traumatic Brain Injury study or a project, join us and contribute towards improving the health care and lessen the global burden of TBI.

EU Global Health Initiatives | Multi-lateral health research activities

International Rare Diseases Research Consortium (IRDiRC)

IRDiRC unites national and international governmental and non-profit funding bodies, companies (including pharmaceutical and biotech enterprises), umbrella patient advocacy organizations, and scientific researchers to promote international collaboration and advance rare diseases research worldwide. The coverage of the Consortium is global and involves stakeholders from **Africa, Asia, Australia, North America, and Europe.**

EU Global Health Initiatives | Multi-lateral health research activities

Global Research Collaboration for Infectious Disease Preparedness (GloPID-R)

- GloPID-R is a network of research funding organizations in the area of infectious disease preparedness research, aimed to **facilitate an effective research response of a new or re-emerging infectious disease** with epidemic and pandemic potential, in order to save lives and economies worldwide.
- GloPID-R has **32 members** worldwide. The World Health Organization, the Coalition for Epidemic Preparedness Innovations (CEPI), the European & Developing Countries Clinical Trials Partnership (EDCTP) and ESSENCE on Health Research initiative are also actively engaged in the network.
 - HHS – Department of Health and Human Services (US)
 - Bill and Melinda Gates Foundation (US)

EU Global Health Initiatives | Multi-lateral health research activities

Global Research Collaboration for Infectious Disease Preparedness (GloPID-R)

- GloPID-R is also actively involved in systemic preparedness, connecting **clinical trial networks**, building a framework for **data sharing** and improving the rapid delivery of **research funding**.

PREPAREDNESS

GloPID-R prepares for upcoming outbreaks by analyzing the current state of knowledge and preparedness and identifying gaps as possible areas for funding. With our international partners, we identify priority areas and create working groups, develop videos and publications, and host workshops on these topics. Together, we are preparing the response to the next epidemic.

Discover the work GloPID-R is doing in advance of the next outbreak.

Chikungunya

Evaluating research gaps and making recommendations for funding.

Clinical Trial Networks

Creating links between clinical trial networks and addressing challenges in capacity building or trial implementation in the midst of a crisis.

Data Sharing

Building the first international framework to facilitate data sharing during public health emergencies.

Social Science Research

Raising awareness about the vital role social science research plays in understanding infectious diseases.

Long-Term Research

Identifying scientific gaps and addressing research challenges through a Long-Term Research Agenda.

Funding

Working to improve the rapid delivery of funds to research projects when a crisis strikes.

RESPONSE

GloPID-R anticipates upcoming epidemics and responds rapidly when an outbreak is of major concern. We facilitate research at the outset of an epidemic to understand and fight emerging or re-emerging pathogens, accelerate results and develop diagnostics, vaccines and therapeutics.

Discover the actions GloPID-R has taken in relation to recent outbreaks.

Novel Coronavirus COVID-19

GloPID-R working with WHO to facilitate and coordinate a rapid research response.

Ebola

Aligning with WHO to coordinate rapid funding for urgent research projects.

Plague

Bringing together scientific experts provide research recommendations to 2017 plague outbreak in Madagascar.

Yellow Fever

This group focused on effectiveness of fractional dosing in 2016 outbreak in Angola.

ZIKA

When the Zika virus struck, GloPID-R quickly mobilized to produce funding, publications and workshops.

CHECK "RESOURCES": current list of downloadable learning resources of **funding opportunities, webinars and publications**, all of which have been developed by GloPID-R members
