Asian slots	Hour 1	INFO DAY	PITCH DAY 1	Japan Regional Workshop
	Hour 2			
American slots	Hour 3	US Regional Workshop (17.00 – 19.00 CET / 11.00 – 13.00 EST / 8.00 – 10.00 PST)	2 nd PLC Meeting (Reserved to Policy Makers)	PITCH DAY 2
	Hour 4			
	March 21	March 22	March 23	March 24

- INFO DAY (March 21, 9.00 - 11.00 CET)**
 This Info Day is dedicated to the IDIH findings and products, as well as to IDIH progress towards sustainability. It will also *highlights* current opportunities for international cooperation in the field of Digital Health for Active and Healthy Ageing.
- US REGIONAL WORKSHOP (March 21, 17.00 - 19.00 CET)**
 This workshop is dedicated to the US landscape of R&I around Digital Health for AHA. It will focus on how COVID has impacted independent and connected living of the older persons with the perspective of start-ups, investors, and the patients themselves. A session will be dedicated to Q&A with the audience.
- PARTNERING DAYS (March 22, 9.00 – 11.00 CET / March 23, 15.00 – 17.00 CET)**
 Partnering Days will be dedicated to the presentation – through a short pitch – of ongoing projects (for results dissemination/exploitation purposes), new project ideas and expertise offers/requests by the organizations working in the field of Digital Health for AHA. Sessions are planned for March 22, 9.00 – 11.00 CET and March 23, 15.00 – 17.00 CET and will be respectively dedicated to Asian and American audience. Do you wish to pitch your project idea or expertise? **Apply HERE! Use [this template](#) to send your Flash Presentation to idih@apre.it by March 14.**
- JAPAN REGIONAL WORKSHOPS (March 23, 9.00 - 11.00 CET)**
 A panel-discussion (in Japanese with English subtitles) will be held with the participation of the Ministry of Internal Affairs and Communication, in charge of HORIZON 2020 in Japan, and some key-players in the R&I landscape in Japan. A session will be dedicated to Q&A with the audience.
- INNOVATION DAY (March 24, 9.00 – 11.00 CET & 15.00 – 17.00 CET)**
 Starting from the findings of IDIH Experts – gathered in the [IDIH Digital Health Transformation Forum](#) – this event will be the occasion to address Digital Health for Active and Healthy Ageing focusing on the three areas suggested by the IDIH Experts for enhancing international cooperation in the field: *Data Governance, Digital Inclusion, Interoperability-by-design*. Thanks to the participation of the [eVita project](#) and the [North American Chapter International Society for Gerontechnology](#), 2 Panel Discussions will further explore these areas highlighting tech challenges and opportunities offered by collaborative research at international level. Co-creation sessions will follow among the panelists, as well as the audience through ad hoc tools for live interactions.

- **Full Title:** International Digital Health Cooperation for Preventive, Integrated, Independent and Inclusive Living
- **Start Date:** 1st May 2019
- **Aim:** Promote and increase international collaboration to advance digital health in the EU and key Strategic Partner Countries to support active and healthy ageing (AHA) through innovation

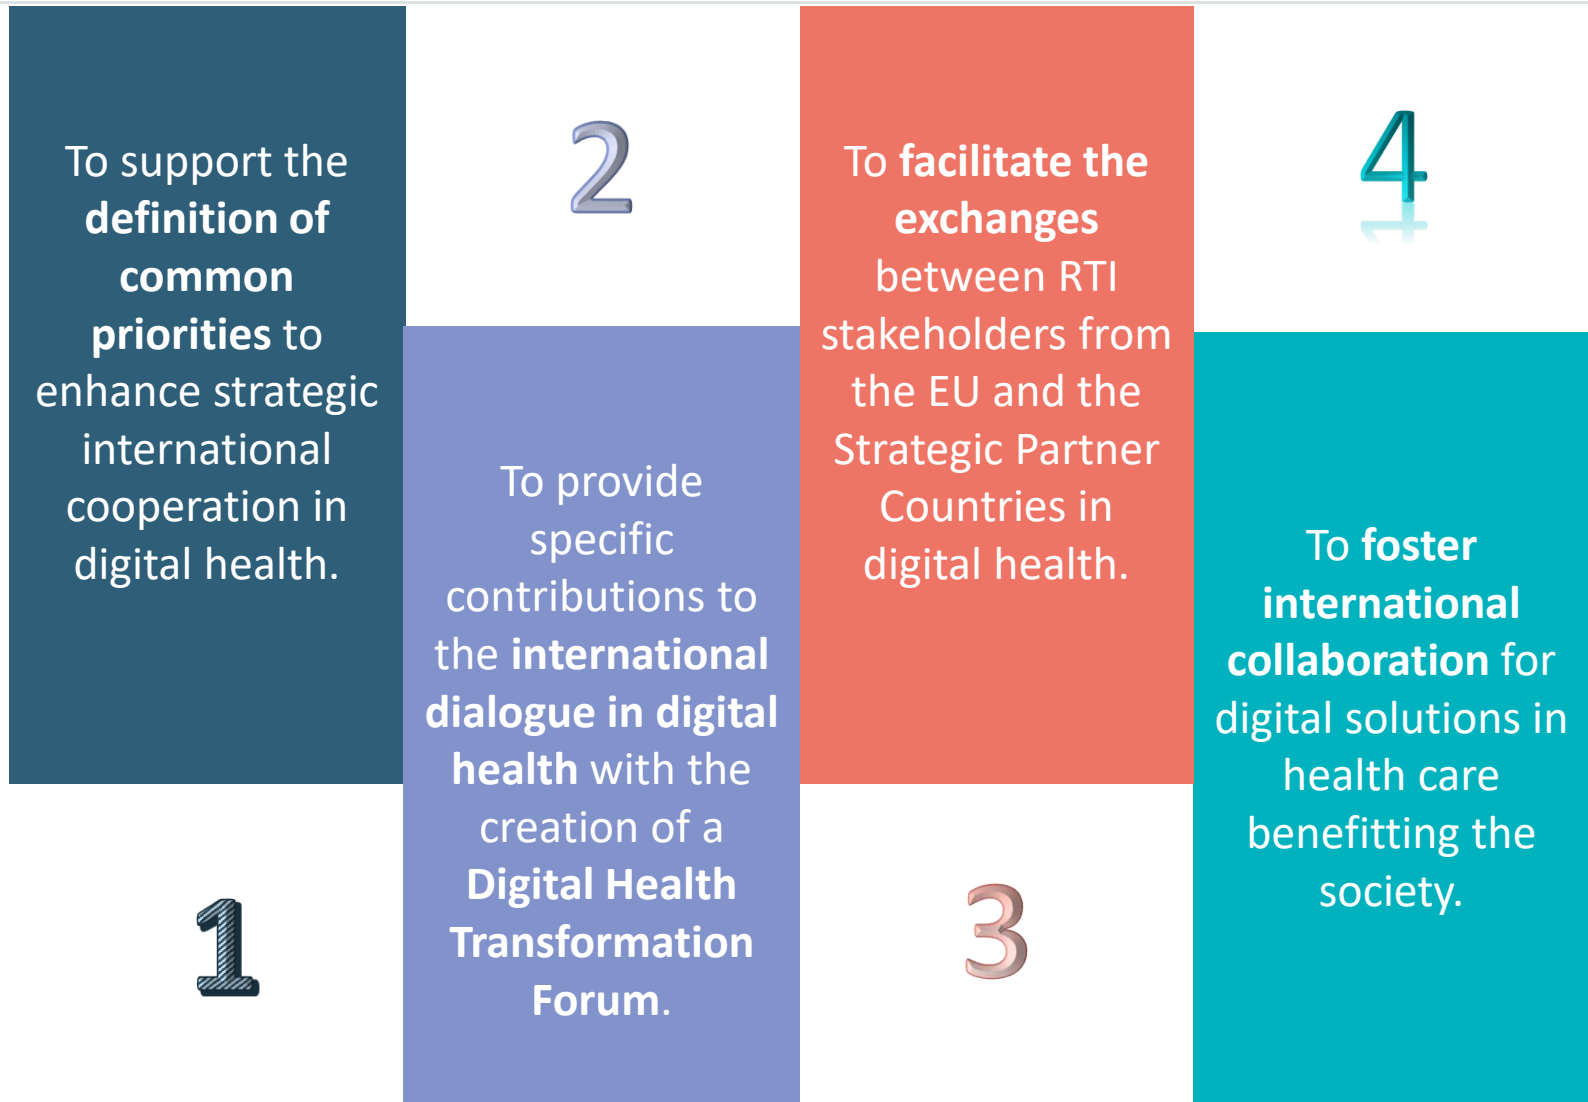

AIM | Promote and increase international collaboration to advance digital health in the EU and key Strategic Partner Countries to support active and healthy ageing (AHA) through innovation

▶ **IDIH serves as a CATALYST for the INTERNATIONAL DIALOGUE in DIGITAL HEALTH for AHA**

Four Targeted Objectives

IDIH Experts Forum

- 4 Experts Groups
- 4 Strategic Topics
- 3 Experts Groups Workshops
- IDIH Week 2021
- IDIH Webinar
- Consultation with the IDIH Users Consultation Group:

Ilenia Gheno, Research Project Manager

Anna Odone, President of the Digital Health section

Peggy Maguire, Director General

中国老年学和老年医学学会智慧医养分会
HEALTH CARE AND LONG CARE SERVICE OF CHINA ASSOCIATION OF GERONTOLOGY AND AGING

Jie Wang, Vice President

Stephen Johnston, co-funder

日本健康技術協会

GERONTECHNOLOGY

Digital Health Transformation Forum

- Expected to become a long-lasting mechanism for international dialogue on exploitation of synergies, promising avenues, and open issues in digital health.
- Shall develop a Roadmap with concrete measures for enhancing collaboration in priority areas.

IDIH Expert Groups

Activities

- Collaborative actions
- Exchange in areas and topics of collaboration in digital health domains
- Ensure mutual learning and knowledge exchange between countries and regions

Experts

- Four Expert Groups (one per strategic topic)
- Experts coming from research, technology, industry, advocacy groups, etc.
- Experts were selected via application process

Four Strategic Topics

	Preventive care	Integrated care	Independent and connected living	Inclusive living
	<p>Focus: Early diagnosis and detection</p> <p>Active and healthy aging begins with a prolonged health regimen. Tech enabled solutions that engage users in health and wellness techniques will allow active and meaningful senior lifestyles.</p>	<p>Focus: Using new technologies to redesign, coordinate and integrate health and social services and place citizens, patients and seniors at the centre of health systems.</p> <p>Technology in the integrated care domain is intended to provide support at the point of care, anytime and anywhere.</p>	<p>Focus: Tele monitoring via smart home and living technologies</p> <p>Connected living is made possible through smart sensors and buildings, mHealth solutions, mobility aids, secure data, robotics, and e health</p>	<p>Focus: Helping the elderly to feel socially more connected</p> <p>Healthy environments equal healthy individuals. In the aging population, a component of healthy living is inclusivity, promoting positive social engagement, and ensuring a rewarding social aspect to age</p>

IDIH (wider) Community

- IDIH | Long-term matchmaking platform
- Open Community at: <https://idih-week-2021.b2match.io/>
- **+390 international stakeholders of Digital Health for Active and Healthy Ageing (32 %Universities, 30% Companies, 9% R&D Institutions)**

Towards IDIH Week 2022!

Join the IDIH long-term matchmaking platform!

Networking&Matchmaking among all the key-stakeholders of digital solutions for Active and Healthy Ageing (AHA) in Europe, Canada, China, Japan, South Korea and USA.

This platform is part of the project **IDIH - International Digital Health Cooperation for Preventive, Integrated, Independent and Inclusive Living** and works as a Community of Experts where registered participants can exchange and match their interests and expertises in the field, starting building new exciting partnerships!

If you are already registered, you can keep schedule and have meetings with your potential international partners whenever you like until December 31, 2023.

If you are not registered yet, you can do it here, then – after creating your online (always editable) profile - you will be enabled to browse the **Participants Catalogue** and the **Marketplace**, and request/accept meetings that can be realized via the platform until December 31, 2023.

How to schedule and have a meeting? It's easy! Visit the page B2B| How it works, you will find step-by-step instructions.

[!] **FURTHER GUIDANCE ON HOW TO HAVE B2Bs**. Check **these instructions** that may help you to access the video conference call directly in the b2match platform.

[!] **UPCOMING**

IDIH Week 2022 will be held on March 2022: to know more and register, please visit the dedicated section.

Towards the *International Experts Forum for Health Innovation*

ENRICH
GLOBAL
TAKING EUROPEAN
INNOVATION GLOBAL

Health Innovation Thematic Group: International Collaboration for Health Innovation

#Health #InternationalCooperation #Policies #Research&Innovation
#Digitalization #Ageing #Stakeholders Engagement

📌 Aim:

- Facilitate international cooperation and policy dialogue on global health issues by harnessing the networking potential and critical mass of ENRICH Global members and their projects.

📌 Activities:

International Experts Forum for Health Innovation establishment and management: this will be done by leveraging on the [IDIH Community of experts](#) +300 stakeholders. Activities and events engaging the Forum (1 Forum event per year, online) will be planned through a Bi-annual Plan.

- Target groups: *Researchers, Care providers, Users/Patients Associations, Health Tech providers, etc.*

International Policy Dialogue Workshops: (1 per year, online) to discuss about global Health challenges and compare Health policies, in a mutual learning and exchange environment that will also encourage eventual joint funding initiatives, to enhance international cooperation in specific sectors of Health*.

- Target groups: *Policy makers and funding agencies in the Health/R&I field*

**Evidence-based policy making will be also favoured through the participation in the workshop of the R&I experts from the International Experts Forum for Health Innovation.*

Objectives

Achievements

Matchmaking

Matchmaking Events!

PlatformUptake.eu project organises **matchmaking events to give** providers of open platforms in the AHA domain, developers of technology for active and healthy ageing (apps, sensors, wearables etc.), care organisations and policy makers the **opportunity to realise collaboration opportunities that mutually benefit all parties**. Interested organisations will be able to register on the PlatformUptake.eu Open Information Hub (www.platformuptake.eu) and submit their pitch decks.

Networking Opportunities

-  **PlatformUptake.eu Consortium**
12 consortium organisations and connected networks (Universities, SMEs, End user organisations)
-  **45+ Projects and initiatives**
AHA, ALA, Health care, IoT etc.
-  **Locations**
10 countries in Europe
-  **10+ Projects events**
Matchmaking, MOOCs, Open Information Hub Tools, Capability gaps and Innovation needs and more
-  **Networks**
IEEE, CEN, IN4AHA, IDIH, 50plus Hellas, SHAFE, Nerosubianco, EEN, NET4Age, ECHalliance etc.

Matchmaking

PlatformUptake.eu & AAL Austria MATCHMAKING | # 2

HIGHLIGHT the benefits of your platform's services, present your solution for Active and Assisted Living, share your requirements and needs for digital health care delivery and FIND your partner!

UNIVERSITA' POLITECNICA DELLE MARCHE- UNIVPM

MARCO BERZANO (PhD)

EU Research support officer and manager

UNIVERSITÀ
POLITECNICA
DELLE MARCHE

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 826092.

Description of the organization

UNIVERSITÀ
POLITECNICA
DELLE MARCHE

- UNIVPM has about **17000 students** and include five faculties of **Engineering, Medicine and Surgery, Economics, Science and Agriculture**, which permanently employ about **540 academics** and **550 technical/administration staff**. The Faculties are situated on three main campuses in Ancona, but UNIVPM facilities are widespread over all regional territory.
- The academic programmes offer **56 courses**, 10 first and second level post-graduate diplomas, **10 specialization courses**, **36 specialization schools** and **9 Ph.D.** schools.
- UNIVPM has increased its presence at European level due to a high standard in research and industrial collaborations for research and development and innovation. In the previous European Research and Innovation Framework, FP7 and Horizon2020, and in other European research programs UNIVPM has secured funding for over 150 EU projects with a total budget of 36M€ and participated in 25 projects with the role of coordinator.

CYBERSECURITY OF MEDICAL DEVICES

Regulation (EU) 2017/745 on medical devices

aims to improve *patient safety* introducing stringent procedures for conformity and post-market surveillance

➔ design and risk procedures must account for **cybersecurity**

Practices for medical device cybersecurity [MDCG 2019-16]:

1. Security management
2. Specification of security requirements
3. Secure by design
4. Secure implementation
5. Security verification and validation testing
6. Management of security-related issues
7. Security update management
8. Security guidelines

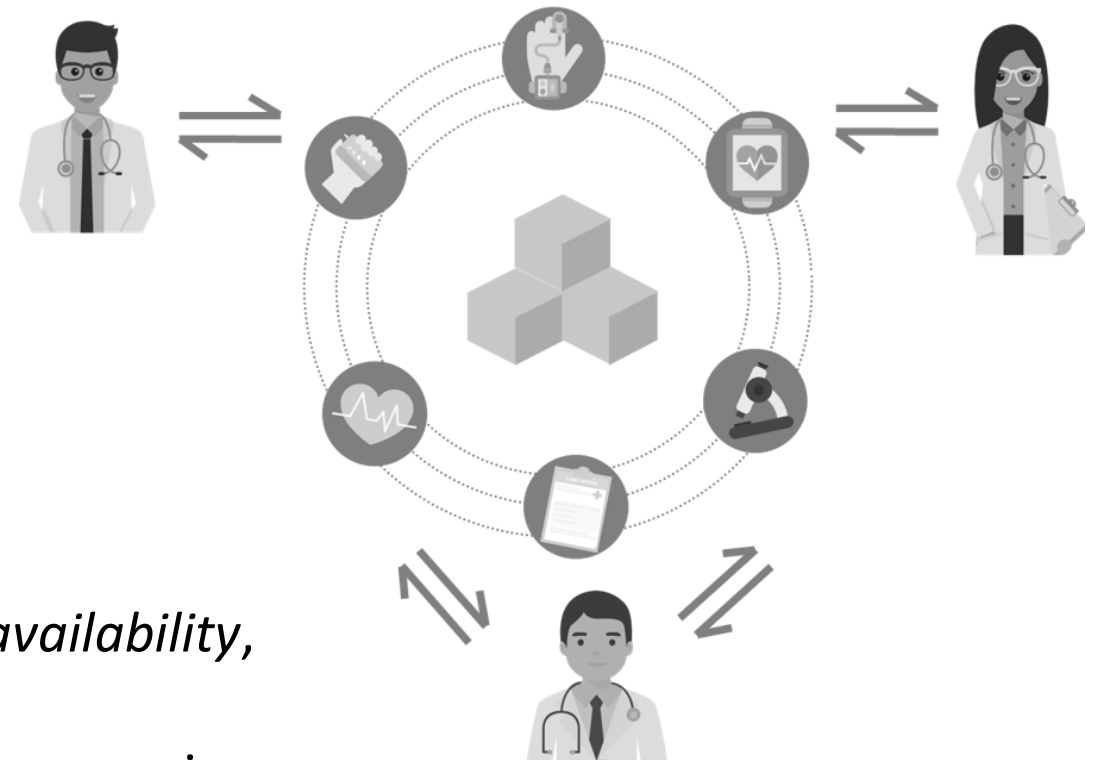

BLOCKCHAIN FOR ELECTRONIC HEALTH RECORDS (EHR)

The **EHR** contains the information for managing any medical process

➔ Useful for sharing sensitive data among authorized individuals

The use of the **blockchain** technology in EHR can:

- ensure a *fast* and *transparent* access to data
- guarantee data *confidentiality*, *integrity*, *availability*, *traceability*, *security*
- improve data management and sharing while preserving *privacy*

EU-JAPAN VIRTUAL COACH FOR SMART AGEING

Toshimi Ogawa

Assistant Professor at TOHOKU University – Sendai, Japan

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 826092.

Description of the organization

EU-Japan Virtual coach for smart ageing

The overall objective of e-VITA is to **improve well-being in older adults in Europe and Japan** and thereby promote active and healthy ageing, contribute to independent living, and reduce risks of social exclusion of older adults.

The multidisciplinary consortium collaborating in this project will develop an **innovative ICT-based virtual coaching system** to **detect** subtle changes in physical, cognitive, psychological and social domains of older adult's daily life.

The e-VITA virtual coach will thus provide **personalized recommendations and interventions**, for sustainable wellbeing in a smart living environment at **home**.

Description of the organization

Project Summary

Background: Virtual coaching can play an important role in sustaining Active and Healthy Ageing (AHA) through early risk detection and tailored intervention in smart living environments. However, current technologies are not easily customized to individual needs, provide limited interaction, and are often intrusive. **Aims and Relevance:** Based on an excellent international cooperation between Europe and Japan, e-VITA proposes an innovative approach to virtual coaching that addresses the crucial domains of AHA: cognition, physical activity, mobility, mood, social interaction, leisure, and spirituality, thus empowering older adults to better manage their own health and daily activities, resulting in improved wellbeing and improved stakeholder collaboration. The e-VITA virtual coach will provide individualized profiling and personalized recommendations based on big data analytics and social-emotional computing beyond the state-of-the-art. **Approach:** The virtual coach will detect preventative potentials and risks in the user's daily living environment by collecting data from external sources and non-intrusive sensors and will provide support through natural interactions with 3D-holograms, emotional objects, or robotic technologies using multimodal and spoken dialogue technology, advanced knowledge graph representations and data fusion. Interoperability and data privacy will be guaranteed using FIWARE and a federated data AI platform. **Proof of concept:** A support system will be provided to enable the elderly users to learn and use the virtual coaching system. The coaching system will be deployed and evaluated in the living environments of healthy older adults in France, Germany, Italy, and Japan to assess its feasibility and efficacy. The results of e-VITA include also new standards and policies beyond technology, and will be consequently exploited and transferred across Europe, Japan and worldwide.

A multidisciplinary consortium ...

... working together to reach 6 main objectives ...

- **Objective 1:** Develop a [set of standards and norms for interoperability](#) of advanced IoT, NLP and AI based smart living technology in Europe and Japan
- **Objective 2:** Develop an [advanced intercultural virtual coach](#) with seamless integration of smart living technologies, advanced AI and tailored dialogue interaction
- **Objective 3:** Enable smart living support and [tailored AHA interventions](#) for physical, cognitive, emotional, and social wellbeing of older adults in real-life settings in Europe & Japan
- **Objective 4:** Propose and design [practice-based ICT tools](#) to empower older adults to experience ageing as a positive process and meaningful period of life
- **Objective 5:** Conduct a [proof of concept study](#) to assess user acceptance in real-life environments from different countries and cultural backgrounds (EU/JP)
- **Objective 6:** Explore the feasibility of a [new ecosystem for disruptive innovations](#) of AHA coaching and incubation of SMEs and NGOs in Europe and Japan

... from a needs-based approach ...

Autonomy
»I can do what I want the way I want it«

Security
»I'm safe from threats and uncertainties«

Competence
»I'm good in what I do«

Stimulation
»I was experiencing new activities«

Relatedness
»I feel close to the people I care about«

Physicalness
»That my body was getting just what it needed«

Popularity
»I have impact on what others do«

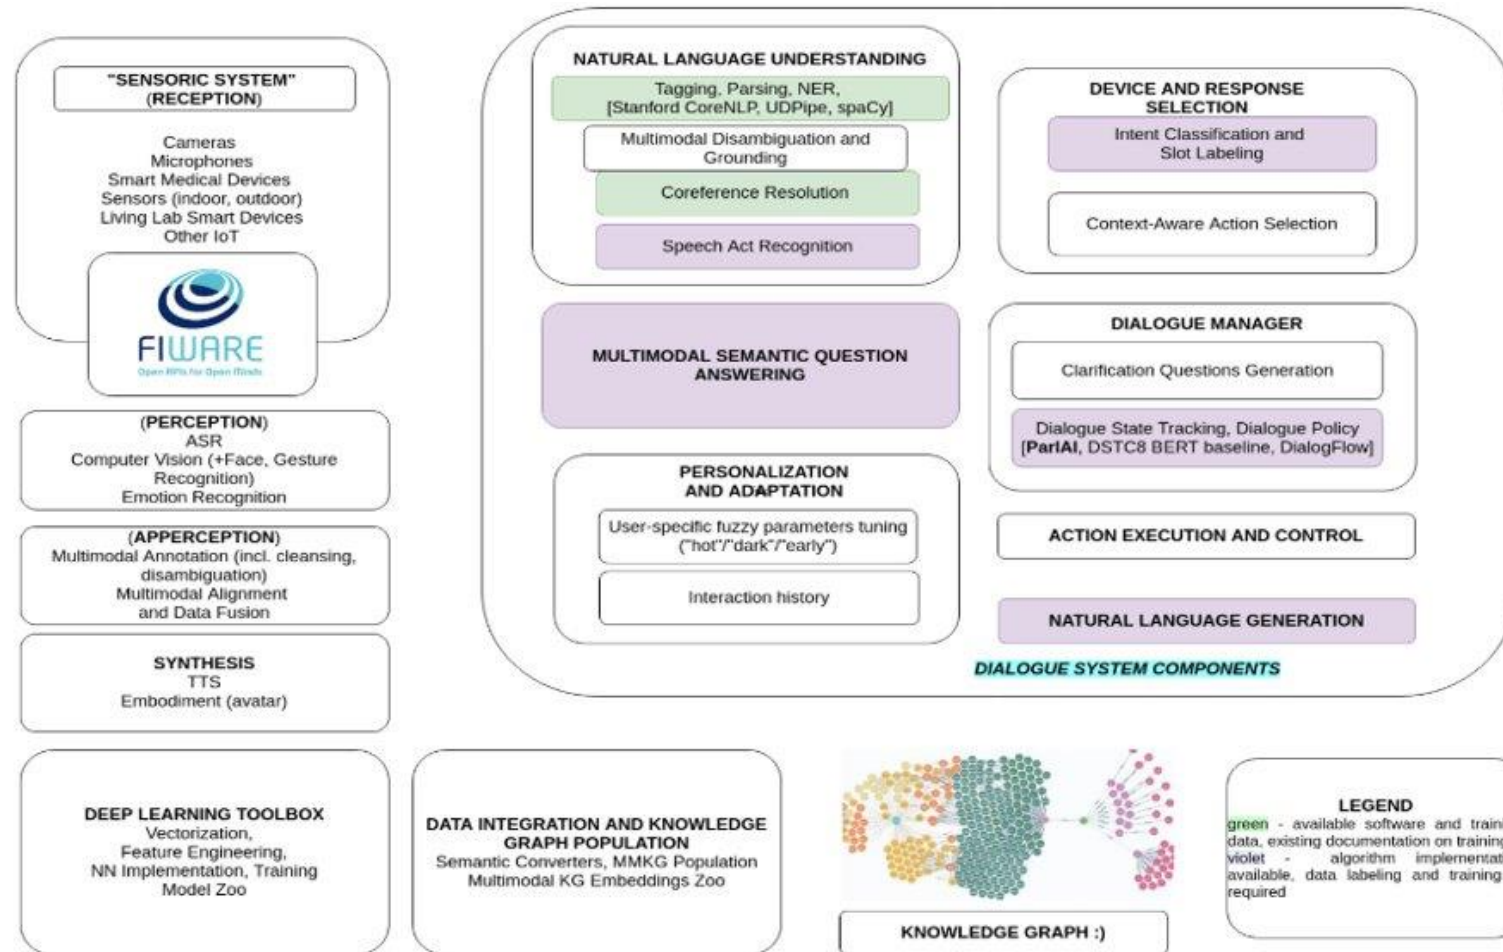

Meaning
»I feel a sense of deeper purpose in life«

Pinktrainer

Orange M Health BV - NL

Mattia Pirani
European Market Manager

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 826092.

Description of the organization

Orange M-Health BV | Pinktrainer

Shareholders

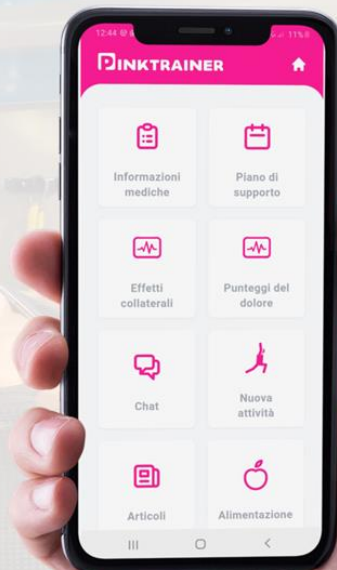

- Monique van Dijk, René Loek and Rob Mentink
- Co-located with 2 medical start-ups (sister companies)
 - Orange M-Health, Evidencio and OSAsense
- Team of 20 employees
 - Medical IT
 - Para (medical) care professionals
 - Regulatory
 - External advisory board

The solution

PINKTRAINER

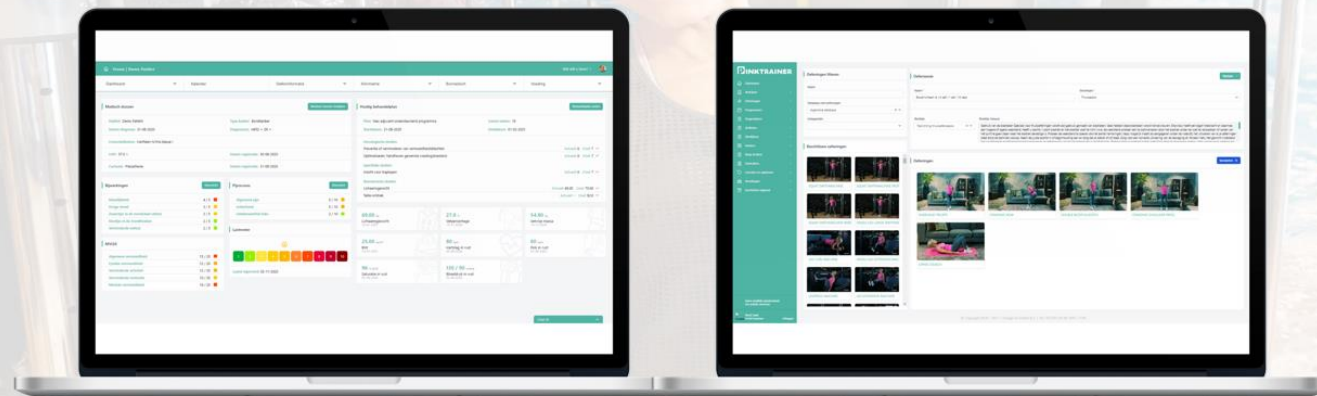

PINKTRAINER

- Pinktrainer is an E-health application with dashboard and interactive patient app
- Holistic approach of exercise, nutrition and mindfulness to support people with cancer before, during and after their treatment
- Available for all cancer patients, hospitals, rehabilitation centers, physiotherapists

Interaction with the medical team

- All interdisciplinary data available in 1 dashboard
- Results and effects of the exercise and nutrition plan on treatment and quality of life real time insights

➤ Available in English, Dutch, Italian and German

What we are looking for ?

- **We are looking for:**
- possibilities to join rk in funded projects as technical partners.
- Cancer centers and medical research hospital willing to make a partnership and test our digital solutions
- Provide our digital solution for specific research trials in the field of cancer and complementary therapies (exercise/nutrition/psychological aspects).

What do we offer?

*Logo of the
organization*

- Already available and ready solutions (currently used in hospitals in Netherlands and Italy).
- Theoretical and technical platform support
- Divulgative content to be uploaded in the platform

Contacts

- **Facebook:** [Pinktrainer italia](#)
- **Linkedin:** [Pinktrainer Italia](#)
- **Tel:** + 39 3477918424
- **Web:** www.pinktrainer.nl

Endocorelab

Albert Valls

General Manager

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 826092.

Description of the organization

- Endocorelab is a scientific business group specialised in Value Based Evidence of the latest breakthrough medical devices on the field of endovascular and cardiovascular fields.
- Holistic Value approach: Clinically and Economically
- Our services cover the evidence needs along the full lifecycle of a medical device from Pre-Clinical to Post-Market Stages.
- Focused on Endovascular and Cardiovascular.

Project Cooperation Idea* (if applicable)

- Through the project of European Health Data sharing to find access to that big data and identify patterns and generate value healthcare evidence for more efficient health and policy decisions taken by the governments.
- Need to find a partner able to get this big data (only endovasclar and cardiovascular) according to EU data protection.
- Need to find a partner with expertise on big data management to find the paterns for us later on generate the evidence and the final value output.

Expertise request* (if applicable)

- Big Data Software.
- Big Data Analysis expertise.
- Data Analysis software in the field of healthcare.
- Digital Healthcare for Clinical Research solutions.
- Data Protection and EU Legislation

Expertise offer* (if applicable)

- CRO: To provide support to the pharmaceutical, biotechnology, and medical device industries in the form of research services outsourced on a contract basis.
- Corelab: diagnostic laboratory, usually understood to be located at a distance from an acute hospital trust, which generates results for Clinical Evidence
- Professional Education in Endovascular
- Real World Evidence
- Health Economics and Outcome Research
- Scientific Event Organisation

Contacts

- Dott. Luca Furlan
 - CEO EndocoreLab
 - luca.furlan@endocorelab.org

- Albert Valls Msc
 - General Manager

Logosnet

Fernando Salvetti

Founder and Managing Partner Logosnet – e-REAL Dept.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 826092.

Description of the organization

The logo for LOGOSNET, featuring the word "LOGOSNET" in white capital letters on a red square background.

We are a service provider **ready to disrupt** the status quo for **healthcare simulation with e-REAL**.

Learners experience **full interactivity and immersion** in a **glasses-free** environment, **both onsite and online**.

e-REAL has been developed by Barbara & Fernando who are instructional designers and communication of science experts that are pioneering the Extended Reality with cutting-edge clients and world-class subject matter experts.

- ✓ SOLE SOURCE PRODUCT
- ✓ REGISTERED BRAND
- ✓ PRIVATELY HELD BY LOGOSNET
- ✓ START-UP SPIRIT
- ✓ CONTINUING R&D
- ✓ TECH AGNOSTICS
- ✓ SYSTEM INTEGRATORS
- ✓ XaaS

Project Cooperation Idea* (if applicable)

LOGOSNET

- Enhanced reality for immersive simulation (e-REAL: www.e-real.net) is the merging of real and virtual worlds: a mixed reality environment for hybrid simulation where physical and digital objects co-exist and interact in real time.
- Demo video: https://youtu.be/A_F5Xs57G5I

Hassisto

Ehealth platforms

Pier Giuseppe Meo

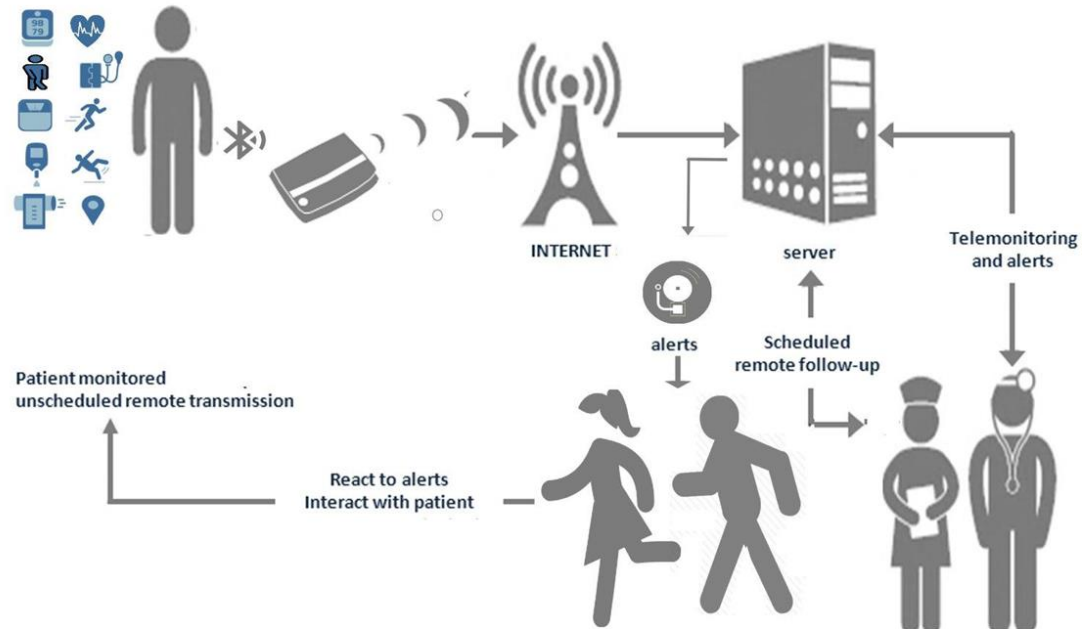

CMO

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 826092.

Healthcare ehealth domestic modular systems for telemonitoring & telemedicine

We act as system integrator to give solutions that best fits customers requirements, integrating and valorizing their previous investments

COVID has exploded the need of **new model of assistance**: no more based on few centralized hospital but instead made of several distributed territorial interconnected points of care.

It requires **new organization models** supported by **tech solutions** to be used also by not skilled people.

Project Cooperation Idea

We are interested in integrated care, independent and connected living.

We don't reinvent the wheel we want to integrate in our solutions existing on market systems and devices

Architecture requirements

Modular, we are building platforms with the aim to quickly add more features to pre existing third parties platforms, no need to dismiss previous investments.

MODULES

- Telemonitoring
- Telemedicine
- Rehabilitation
- Treatments
- Clinical intervention diary
- Activity Planner
- Reminders
- Team care sharable infos

in progress

- pill dispenser/ hydration
- emergency management

Multilingual, to better involve home foreign caregivers

Expertise request

*Existing just on market software that want to add new home telemonitoring capabilities or that can be used as subsystem of a more complex platform
implementation of digital solutions for active and healthy ageing and multichronic diseases*

Partnerships

- solution producers that want to sell in Italy with a local skilled support
- commercial to expand Hassisto in nations, or interested to distribute their solutions in Italy
- technical to quickly improve features

Expertise offer

- **MARKET KNOWLEDGE**
- **EXPERIENCE**
- **CONCRETE RESULTS**

We are an italian spinoff of the National Council of Research CNR with seniors expertise in public health management , european R&D funds, software/app development
